

## **BPO2**

## SITE SELECTION

There are many screens in BPO which require *Site selection* before proceeding with a process. Not selecting a Site in these scenarios will cause an 'error' message either when trying to move on to the next screen or when attempting to save information.

## **DEFAULT SITE CONFIGURATION**

The <u>default</u> Site displayed in the *Site filter* is dependent on what is <u>configured</u> on the user.

**Ribbon Access:** Configurator > Security > User Management

- 1. The User Management screen will display.
- 2. Expand the *User Group* that contains the user where you wish to check the set up details.
- 3. In this example, the user is in the *Administration* group.

- 1. The *Users* frame will expand.
- 2. Select the *row* of the user you wish to view. (This will be the user linked to the system where you are testing the Site filter.)
- 3. Click on *Edit*.

- 1. The *Maintain User* screen will open.
- 2. In the *User Maintenance* frame, look for the *Default Site* field.
  - Whatever is set in this field will be the <u>default site</u> that displays in the *Site filter* in BPO.

### 'ALL SITES' SET AS THE DEFAULT SITE

#### Example 1

3. In this example, the Default Site is set to All Sites.

This means that in BPO, the user will need to select the <u>correct Site</u> each time they are actioning a screen that includes a Site filter.

#### SINGULAR SITE SET AS THE DEFAULT SITE

#### Example 2

If the company has <u>only one</u> Site (branch) the Default Site field may be set to that singular Site. The user will <u>not</u> need to select a Site when they are working in screens that contain a Site filter.

## SITE FILTER SELECTION IN BPO

In BPO, the *Site filter* would display as shown in the images below. In this process, the **Inventory** module has been selected as an example.

**Ribbon Access:** *BPO > Inventory > Part Requests* 

### 'ALL SITES' SET AS THE DEFAULT SITE

- 1. The Part Requests for the Site listing screen will open.
- 2. Note that the Site filter is set to *All Sites* (Example 1 above).

The user will need to manually select the Site.

- Click on the *drop-down arrow* in the Site field and select the <u>relevant</u> Site from the drop-down list.
- 2. In this example, *Durban* is selected.

- 1. The selected Site will popular the *Site filter* field.
- 2. The screen will *refresh* to display the data relevant to the selected Site.
- 3. Now that there is data in the grid, certain *Action buttons* will activate according to the auto-selected first row and the State/Type Selection.
