EXCHANGE RATES

An exchange rate is the value of a nation's currency in terms of the currency of another nation or economic zone.

In order to use foreign currencies in BPO, the currencies must first be configured in BPO Configurator with the same codes as used in the corresponding financial system.

Exchange Rates must be manually updated in BPO in order for the required rate to apply.

UPDATE EXCHANGE RATES

• The **Currency Exchange Rate** listing screen will open, displaying the currently set Exchange Rates, for the currencies configured in the system.

1 BPO2 v2.5.0.8 or higher

• Update the currency exchange rates by typing the New Rate and selecting the New Effective Date (or leaving as the current date).
