

MANUFACTURING

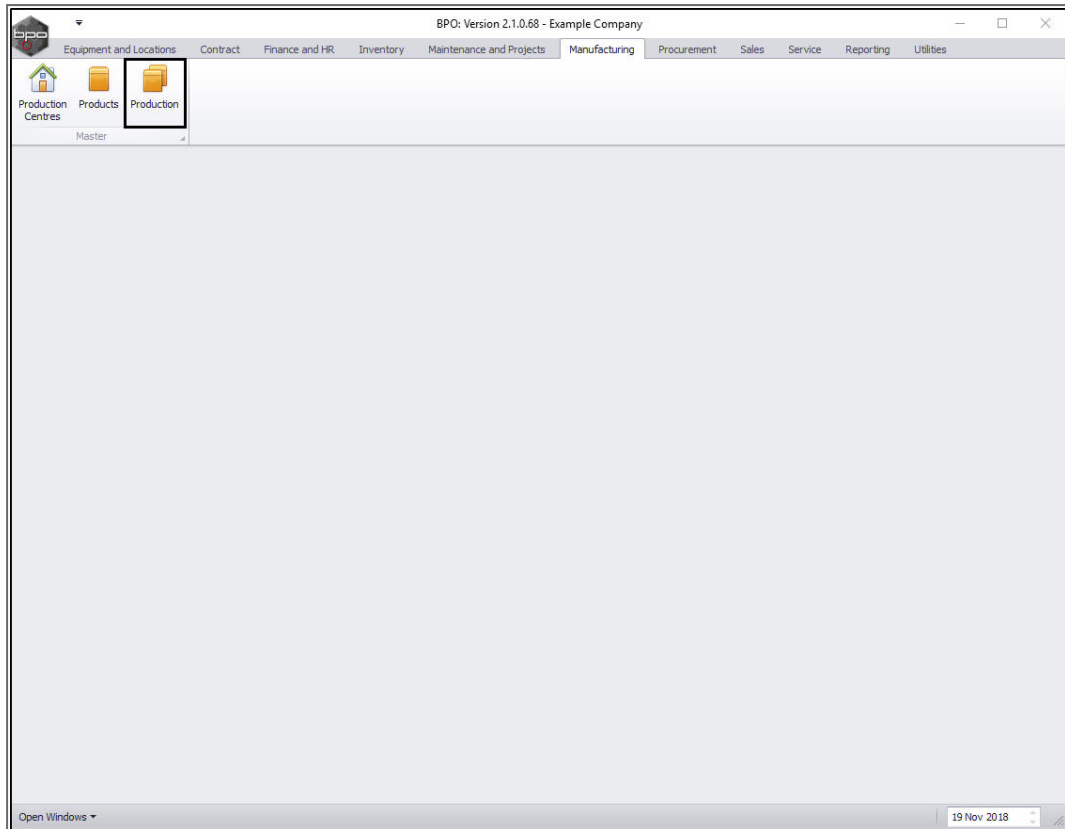

PRODUCTION – CLOSE A PRODUCTION RUN

Only once all parts have been **issued** and subcons, time, expenses, (if any) have been logged, can the production run be **closed**.

Closing the production run will **'consume'** the stock issue to the production work order, and the system will generate a manufactured **product** which will be visible in **stock**.

You will have the opportunity to note **how many** items were produced. If **less** products were produced, the surplus parts issued must first be **returned to store** (if they are re-useable), before the production is closed.

Ribbon Access: *Manufacturing > Production*

The *Production listing* screen will be displayed.

CLOSE A PRODUCTION RUN

- Select the *row* of the *production run* that you wish to close.
 - In this example, an **Acer Copier** (A-class item) has been selected.
- Click on **Close**.

Open Windows 06 Jan 2019

- A **Close Production Run** message box will pop up asking;
 - **Are you sure you want to close this production run?**
- Click on **Yes**.

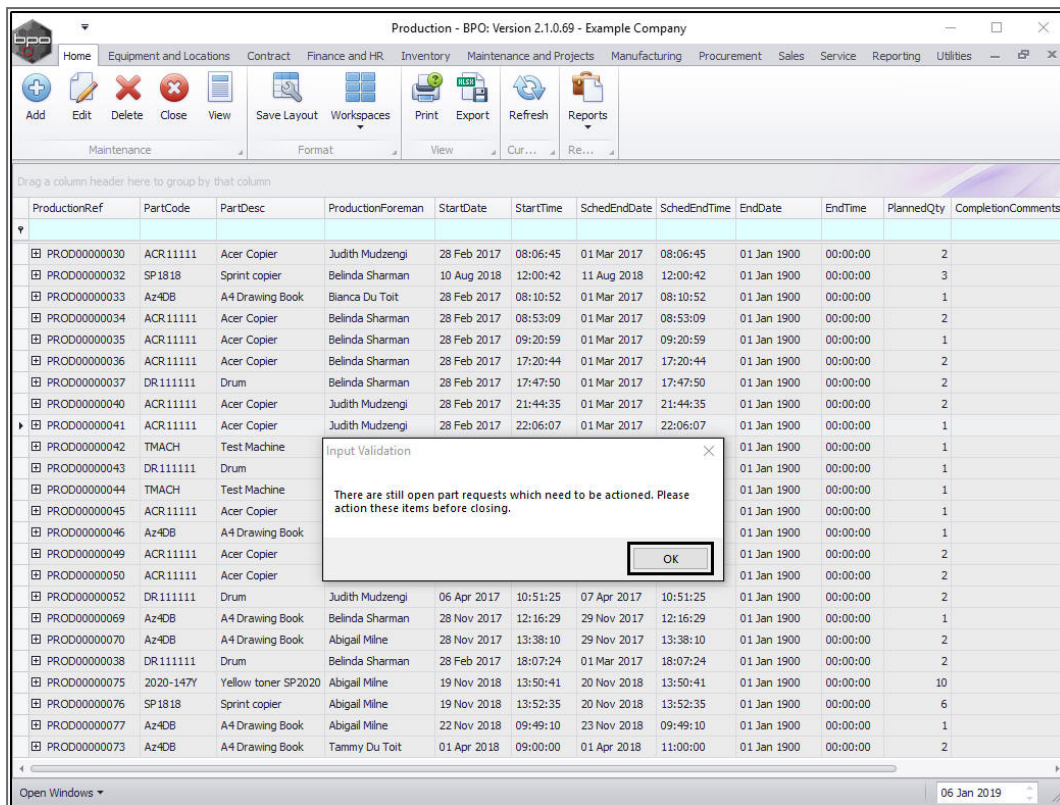

The screenshot shows the 'Production - BPO: Version 2.1.0.69 - Example Company' window. The main table lists production runs with columns: ProductionRef, PartCode, PartDesc, ProductionForeman, StartDate, StartTime, SchedEndDate, SchedEndTime, EndDate, EndTime, PlannedQty, and CompletionComments. A dialog box titled 'Close Production Run' is open, asking 'Are you sure you want to close this production run?' with 'Yes' and 'No' buttons. The 'Yes' button is highlighted.

PRODUCTION ISSUES

OUTSTANDING PART REQUESTS

- If there are **outstanding part requests** linked to this production run then an **Input Validation** message box will pop up informing you that:
 - **There are still open part requests which need to be actioned. Please action these items before closing.**
- Click on **OK**.
- Open the Work Order Maintain screen and issue the outstanding part requests if they have been approved.

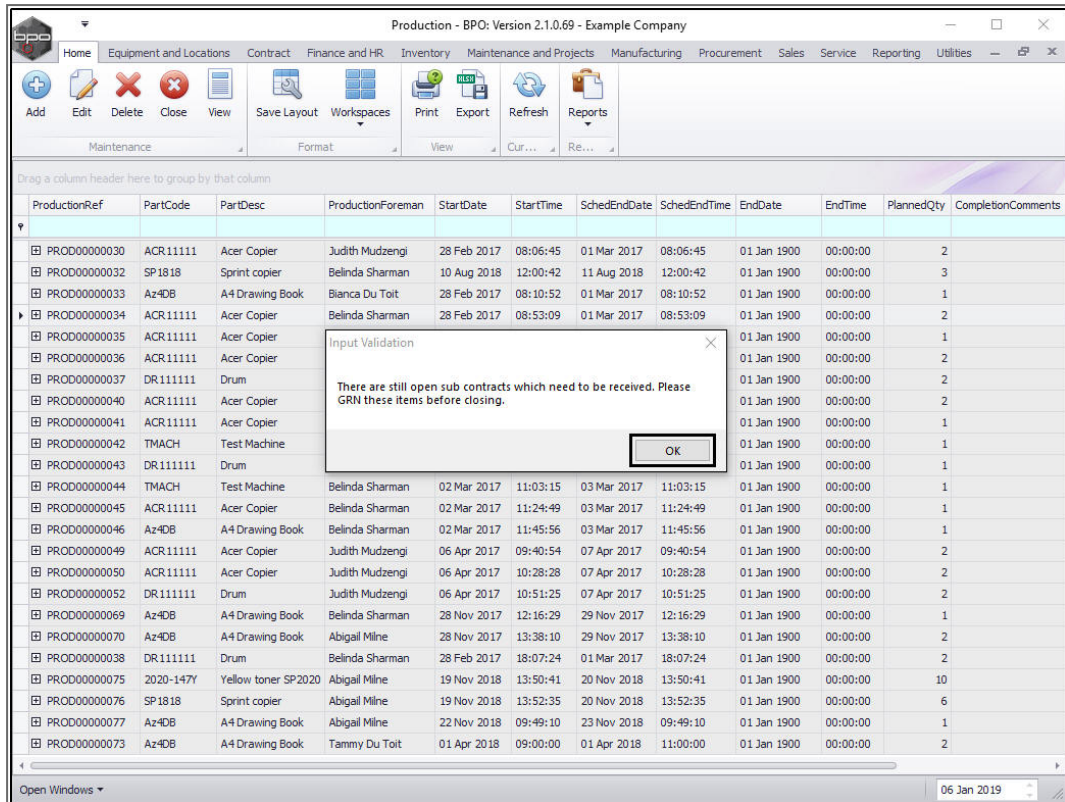

The screenshot shows the 'Production - BPO: Version 2.1.0.69 - Example Company' window. The main table lists production runs with columns: ProductionRef, PartCode, PartDesc, ProductionForeman, StartDate, StartTime, SchedEndDate, SchedEndTime, EndDate, EndTime, PlannedQty, and CompletionComments. An 'Input Validation' dialog box is open, displaying the message: 'There are still open part requests which need to be actioned. Please action these items before closing.' with an 'OK' button.

- You may also receive the following **Input Validation** message;
 - There are still open sub contracts which need to be received. Please GRN these items before closing.***
- Click on **OK**.
- Receive** the third party services before attempting to close the production run again.
- You can also **open the Work Order Maintain screen** and **procure** third party services.

Note: If there are **no outstanding** part requests and **no open sub contracts** to be received, the system will take you straight to the **Production Completion** screen. Click on either **Production Completion for A/B class items** or **Production Completion for C class items** for more information.

The screenshot shows the CO3 BPO software interface. The title bar reads "Production - BPO: Version 2.1.0.69 - Example Company". The menu bar includes Home, Equipment and Locations, Contract, Finance and HR, Inventory, Maintenance and Projects, Manufacturing, Procurement, Sales, Service, Reporting, Utilities, and a search icon. The toolbar contains icons for Add, Edit, Delete, Close, View, Save Layout, Workspaces, Print, Export, Refresh, and Reports. Below the toolbar, there are tabs for Maintenance, Format, View, Cur..., and Re....

The main area displays a table with the following columns: ProductionRef, PartCode, PartDesc, ProductionForeman, StartDate, StartTime, SchedEndDate, SchedEndTime, EndDate, EndTime, PlannedQty, and CompletionComments. The table contains 20 rows of production data. An "Input Validation" dialog box is open over the table, displaying the message: "There are still open sub contracts which need to be received. Please GRN these items before closing." with an "OK" button.

Open Windows

06 Jan 2019

To return to the **Production []** listing screen after further processing:

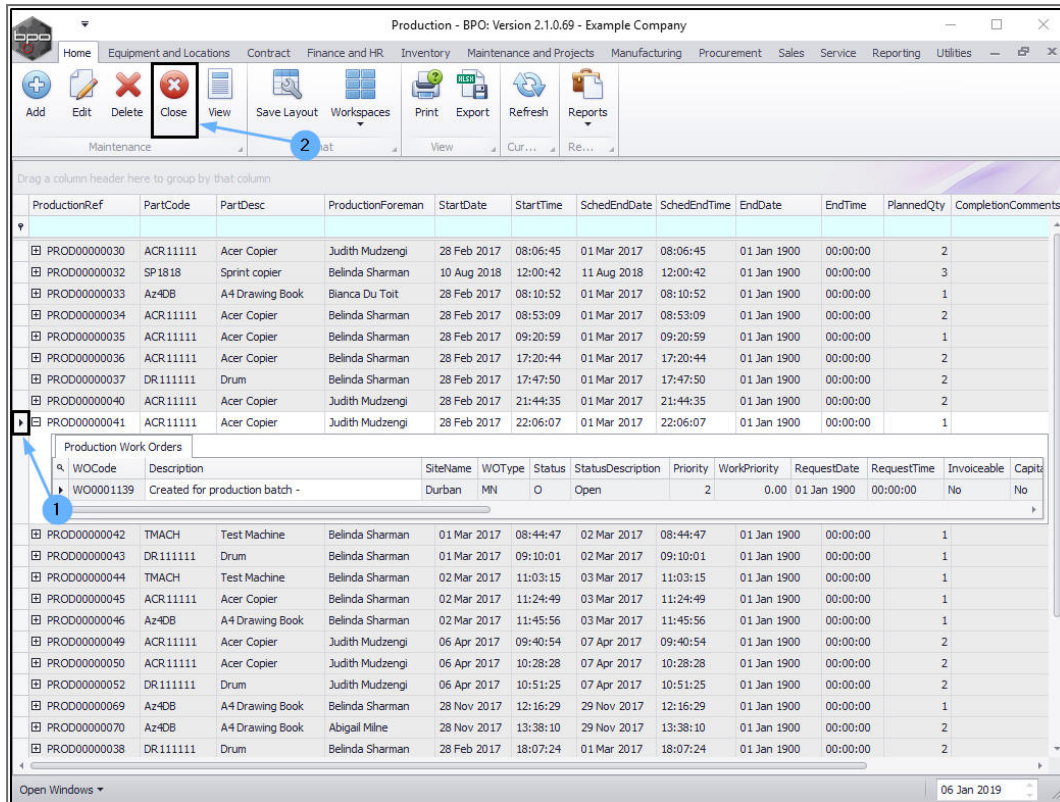

1. Click on the Open Windows **drop-down arrow** in your current screen to display
2. the Open Windows **menu** and
3. select **Production**.

You will return to the **Production** listing screen.

Now you can try to **close** the production run again.

1. Ensure that the **row selector** is in front of the **same production run** that you wished to close.
2. Click on **Close**.

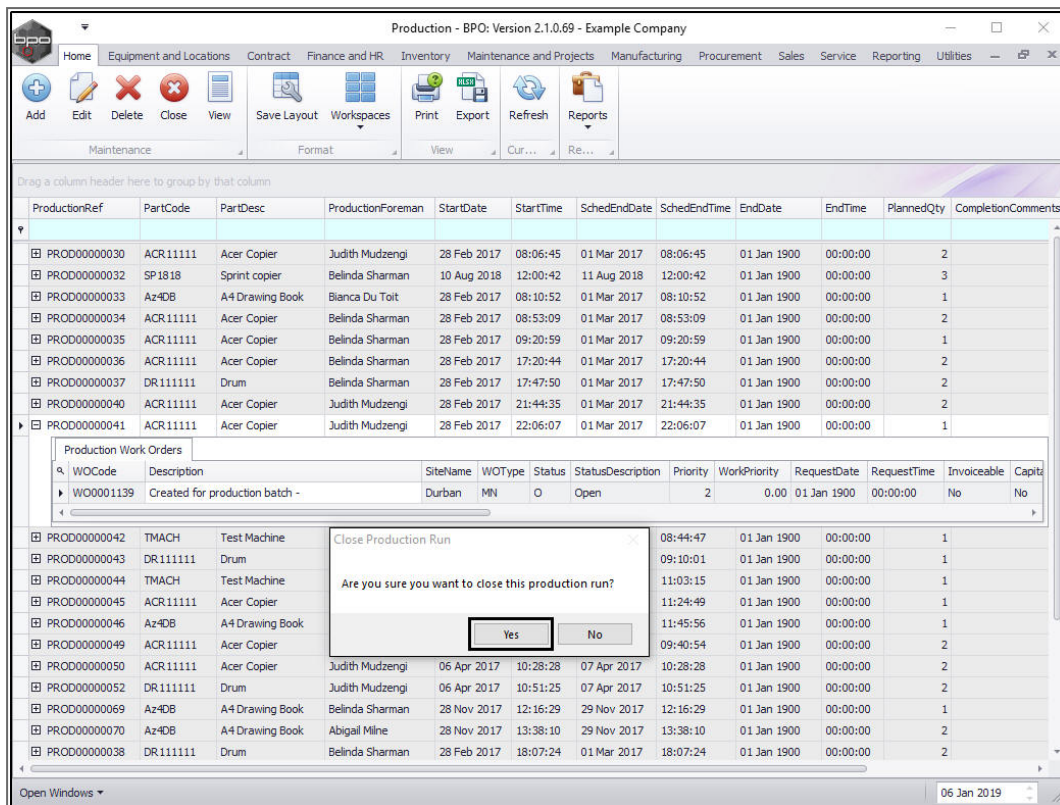

The screenshot shows the 'Production - BPO: Version 2.1.0.69 - Example Company' window. The 'Close' button in the toolbar is highlighted with a red circle and a blue arrow labeled '2'. A blue arrow labeled '1' points to the 'Production Work Orders' table.

- A **Close Production Run** message box will pop up asking;
 - **Are you sure you want to close this production run?**
- Click on **Yes**.

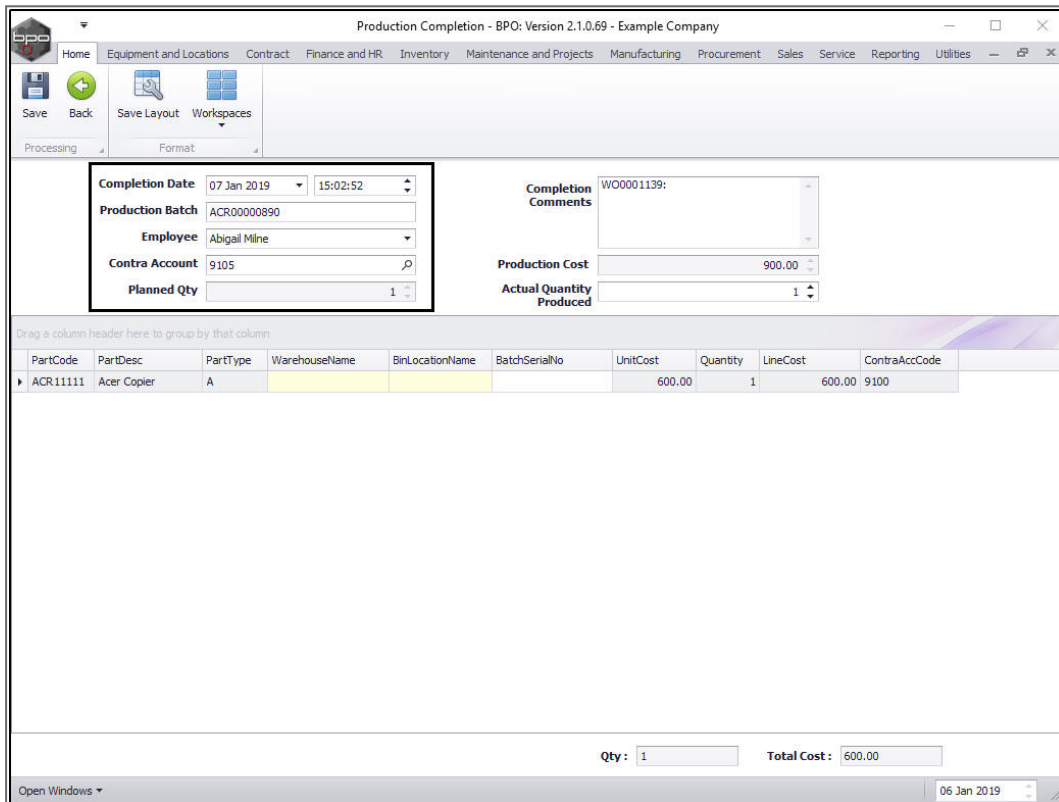

PRODUCTION COMPLETION - A/B-CLASS PRODUCT

The **Production Completion** screen will be displayed. Check all the production details:

- **Completion Date (and Time)** This will populate with the current date and time.
 - **Completion Date:** You can either type in or click on the drop-down arrow and use the calendar function to select an alternative date.
 - **Completion Time:** You can either type in or use the directional arrows to select an alternative date.
- **Production Batch:** This will auto populate with the batch serial number set up on this production run.

- **Employee:** This will populate with the employee currently logged on to the system but you can click on the drop-down arrow and select an alternative employee if required.
- **Contra Account:** This will populate with the chart of account number initially set up for this production run. You can click on the search button and select an alternative account number if required.
- **Planned Quantity** This will auto populate with the quantity that was initially planned to be produced.

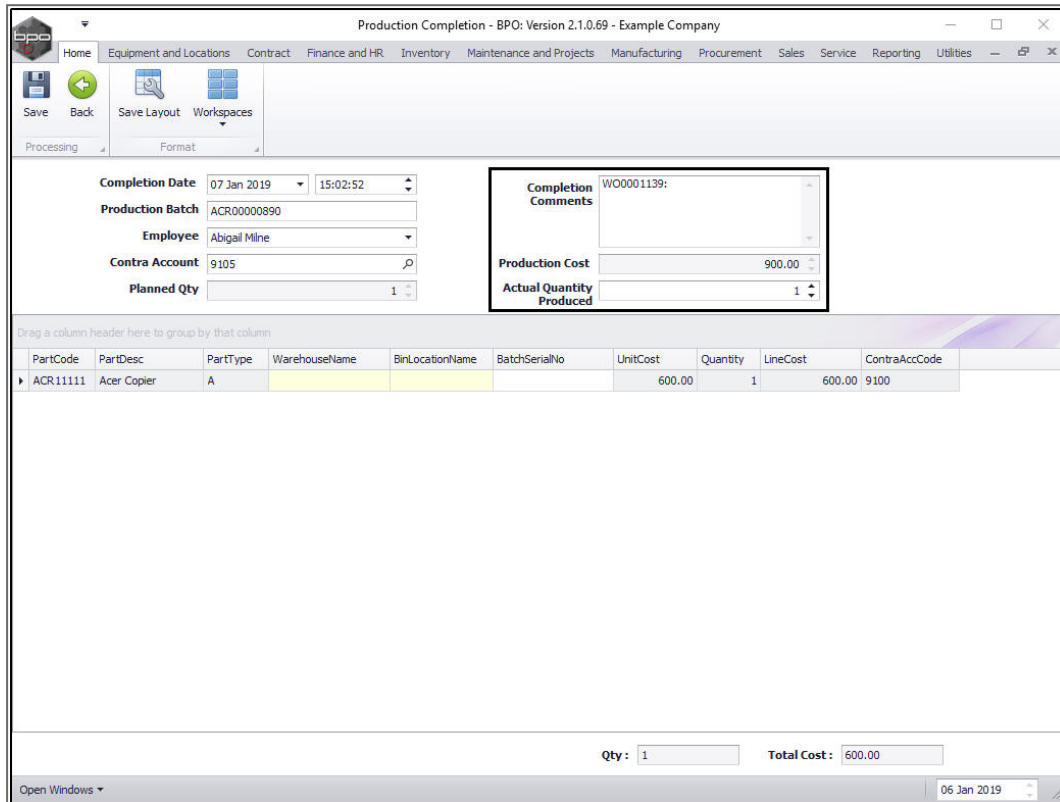

PartCode	PartDesc	PartType	WarehouseName	BinLocationName	BatchSerialNo	UnitCost	Quantity	LineCost	ContraAccCode
ACR11111	Acer Copier	A				600.00	1	600.00	9100

- **Completion Comments:** This will populate with the linked work order number. You can add other comments as required.
- **Production Cost:** This is the **total cost** of the production run (the sum of the parts used to make the product). This is **not**

dependant on the amount of units produced in the production run.

- **Actual Quantity Produced:** Check that the Actual Quantity Produced is correct. If not, either type or use the directional arrows to select the quantity that has actually been produced.

Production Batch: ACR00000890

Employee: Abigail Milne

Contra Account: 9105

Planned Qty: 1

Completion Comments: W00001139:

Production Cost: 900.00

Actual Quantity Produced: 1

Drag a column header here to group by that column

PartCode	PartDesc	PartType	WarehouseName	BinLocationName	BatchSerialNo	UnitCost	Quantity	LineCost	ContraAccCode
ACR11111	Acer Copier	A				600.00	1	600.00	9100

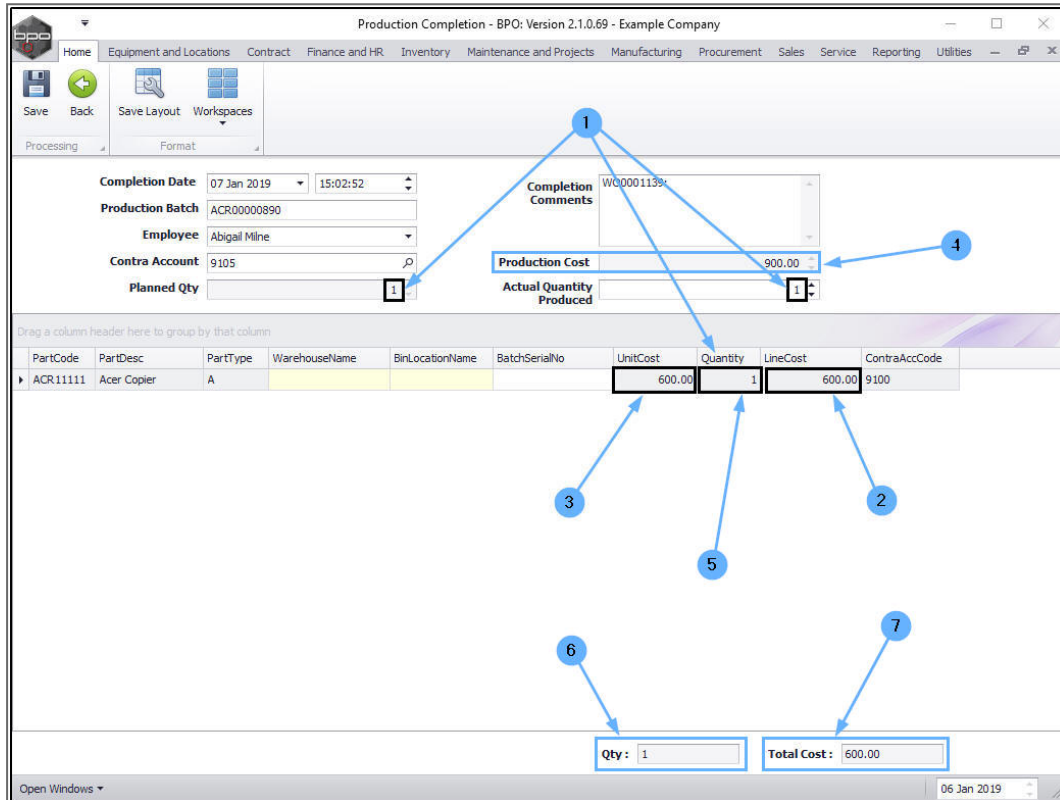

Qty: 1 Total Cost: 600.00

Open Windows 06 Jan 2019

CHANGE THE ACTUAL QUANTITY PRODUCED – A/B-CLASS PRODUCT

1. In this example, you can see that the **Actual Quantity Produced** is the same as the **Planned Quantity** and this is also reflected in the **Quantity** column in the parts data grid.
2. **Line Cost:** this is the Unit Cost divided by the actual quantity produced. (In this image the line cost is $600 \div 1 = 600$)
3. **Unit Cost:** this is the cost of producing **1** unit.

4. **Production Cost:** this is the total cost of production according to the system cost of the parts used (this will not be according to Standard Price - even if this is selected).
5. **Quantity column:** this will record only 1 per line (as this is an A or B-class item.)
6. **Quantity field:** this will reflect the total of A or B-class items produced.
7. **Total Cost:** this is the Unit Cost x the Actual Quantity produced.

Production Completion - BPO: Version 2.1.0.69 - Example Company

Completion Date: 07 Jan 2019 15:02:52
 Production Batch: ACR00000890
 Employee: Abigail Milne
 Contra Account: 9105
 Planned Qty: 1

Completion Comments: WO0001139

Production Cost: 900.00
 Actual Quantity Produced: 1

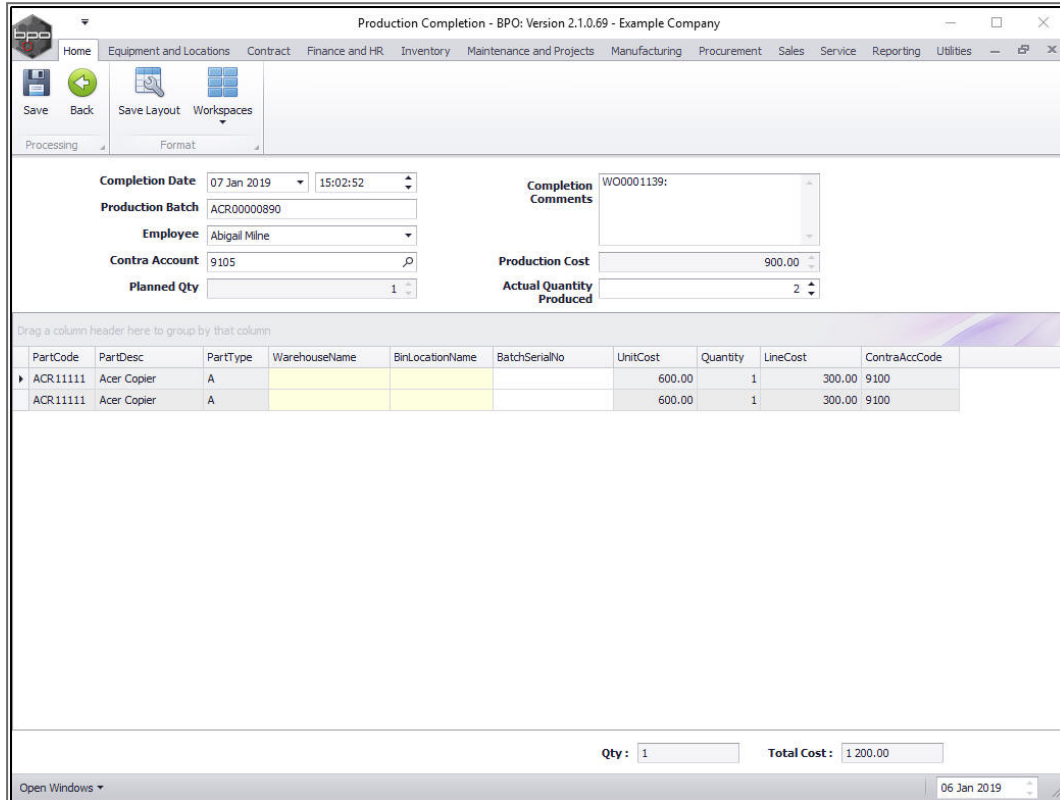

PartCode	PartDesc	PartType	WarehouseName	BinLocationName	BatchSerialNo	UnitCost	Quantity	LineCost	ContraAccCode
ACR11111	Acer Copier	A				600.00	1	600.00	9100

Qty: 1 Total Cost: 600.00

In this example the **Actual Quantity Produced** has been increased to 2.

1. The new **Actual Quantity** (2) will reflect in the **Quantity** column in the Parts data grid.
 - **Note:** As this is an A-Class item each item is placed in a single row (as opposed to a C-Class items where the quantity increase or decrease will reflect in the Quantity column of the same row).

2. The **Planned Quantity** figure will remain the same.
3. The **Line Cost** is the Unit Cost divided by the actual quantity produced.
(Therefore in this image, the line cost is $600 \div 2 = 300$)
4. The **Unit Cost** per item line will remain the same.

Production Completion - BPO: Version 2.1.0.69 - Example Company

Completion Date: 07 Jan 2019 15:02:52

Production Batch: ACR00000890

Employee: Abigail Milne

Contra Account: 9105

Planned Qty: 1

Completion Comments: W00001139:

Production Cost: 900.00

Actual Quantity Produced: 2

PartCode	PartDesc	PartType	WarehouseName	BinLocationName	BatchSerialNo	UnitCost	Quantity	LineCost	ContraAccCode
ACR11111	Acer Copier	A				600.00	1	300.00	9100
ACR11111	Acer Copier	A				600.00	1	300.00	9100

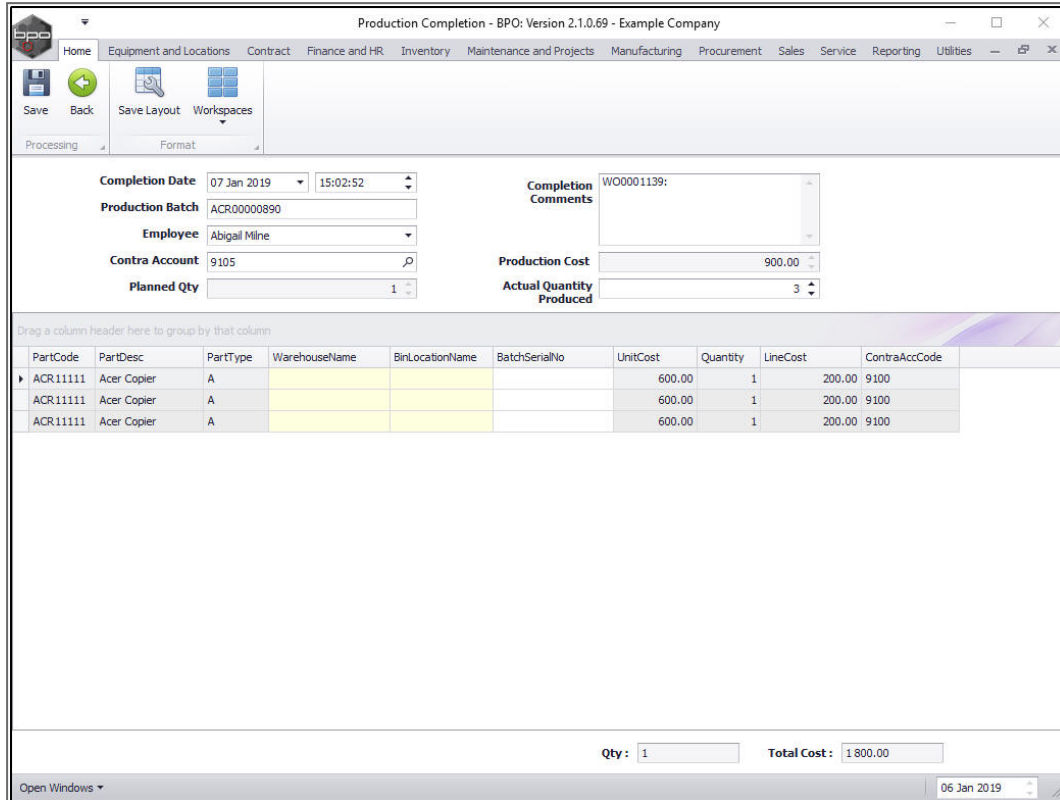

Qty: 1 Total Cost: 1 200.00

In this example the **Actual Quantity Produced** has been increased to **3**.

1. The new **Actual Quantity (3)** will reflect in the **Quantity** column in the Parts data grid.
 - **Note:** As this is an A-Class item each item is placed in a single row (as opposed to a C-Class items where the quantity increase will reflect in the Quantity column of the same row).
2. The **Planned Quantity** figure will remain the same.
3. The **Line Cost** is the Unit Cost divided by the actual quantity produced.

(Therefore in this image, the line cost is $600 \div 3 = 200$)

4. The **Unit Cost** per item line will remain the same.

PRODUCTION COMPLETION - C-CLASS.PRODUCT

The **Production Completion** screen will be displayed. Check all the production details:

- **Completion Date (and Time)** This will populate with the current date and time.
 - **Completion Date:** You can either type in or click on the drop-down arrow and use the calendar function to select an alternative date.
 - **Completion Time:** You can either type in or use the directional arrows to select an alternative date.
- **Production Batch:** This will auto populate with the batch serial number set up on this production run.

- **Employee:** This will populate with the employee currently logged on to the system but you can click on the drop-down arrow and select an alternative employee if required.
- **Contra Account:** This will populate with the chart of account number initially set up for this production run. You can click on the search button and select an alternative account number if required.
- **Planned Quantity** This will auto populate with the quantity that was initially planned to be produced.

CHANGE THE ACTUAL QUANTITY PRODUCED - C-CLASS PRODUCT

1. In this example, you can see that the **Actual Quantity Produced** is the same as the **Planned Quantity** and this is also reflected in the **Quantity** column in the parts data grid.
2. The total **Line Cost** will remain the same no matter what the **Actual Quantity Produced** is.

3. The **Unit Cost** is the cost of producing **1** unit.
4. The **Production Cost** is
 - In this example, **3** 'units' will be produced so the Line Cost is **R1650** divided by **3** which equals **R550**.
5. Quantity and Total Cost???

Production Completion - BPO: Version 2.1.0.69 - Example Company

Completion Date: 08 Jan 2019 12:29:55
 Production Batch: 19-12-147K00000006
 Employee: Abigail Milne
 Contra Account: 9105
 Planned Qty: 3

Completion Comments: WO0001722
 Production Cost: 1 052.94
 Actual Quantity Produced: 3

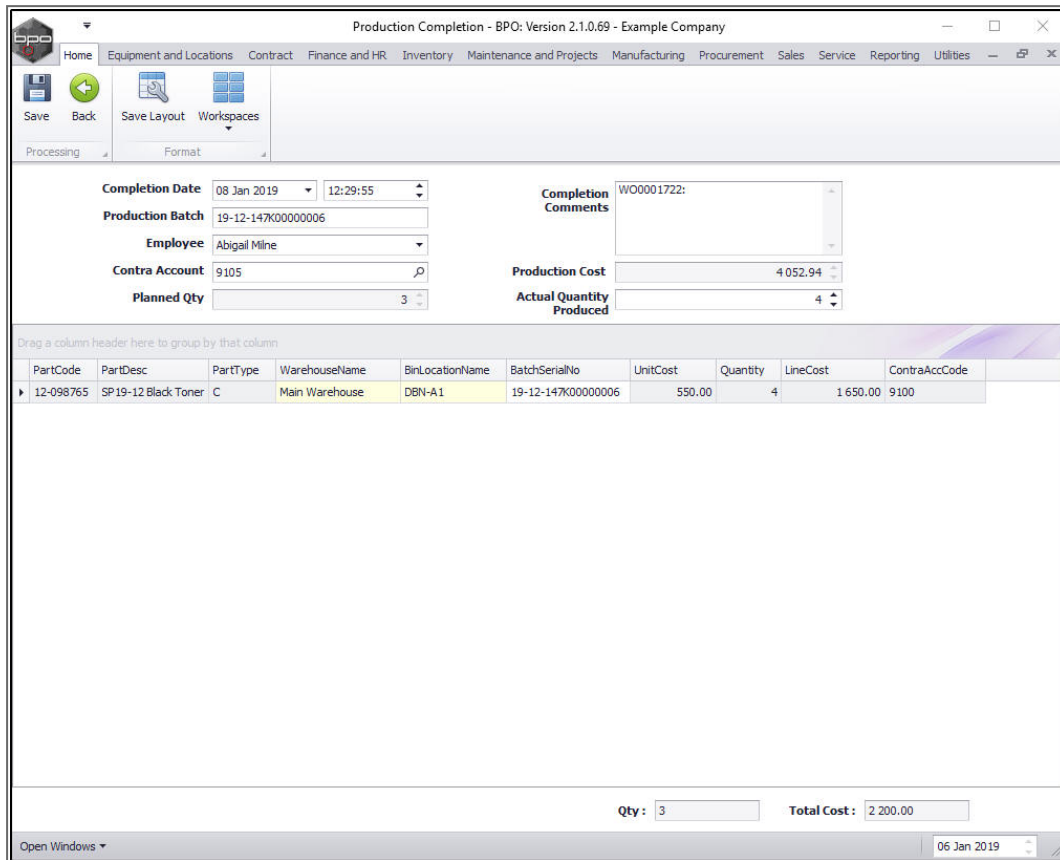

PartCode	PartDesc	PartType	WarehouseName	BinLocationName	BatchSerialNo	UnitCost	Quantity	LineCost	ContraAccCode
12-098765	SP 19-12 Black Toner	C	Main Warehouse	DBN-A1	19-12-147K00000006	550.00	3	1 650.00	9100

Qty: 3 Total Cost: 1 650.00

In this example the **Actual Quantity Produced** has been increased to **4**.

1. The new **Actual Quantity** (**4**) will reflect in the **Quantity** column in the Parts data grid.
 - **Note:** As this is a C-Class items, the quantity increase or decrease will reflect in the Quantity column of the same row).
2. The **Planned Quantity** figure will remain the same.
3. The total **Line Cost** will remain the same.

4. The **Unit Cost** per item line will remain the same.
5. Quantity and Total Cost ???

Move down to the **Parts** data grid.

1. You will note that this data grid auto populates with the:
 - **Part Code:** This is the code as set up on the part.
 - **Part Description:** This is the description as set up on the part.
 - **Part Type:** This is the type as set up on the part.
 - **Warehouse Name:** (where the unit will be sent after production). This field will only be populated if a default warehouse and bin has been set up on the part.
 - **Bin Location Name:** This field will only be populated if a default warehouse and bin has been set up on the part.

- **Batch Serial No:** This is the Production Batch No.
- **Unit Cost:** This is the cost of producing 1 unit.
- **Quantity:** This reflects the quantity as entered in the Actual Quantity Produced column.
- **Line Cost:** This is the total cost of the production run (the sum of the parts used to make the product).
- **Contra Account Code:** This is the default Contra Account Code as set up on the part.

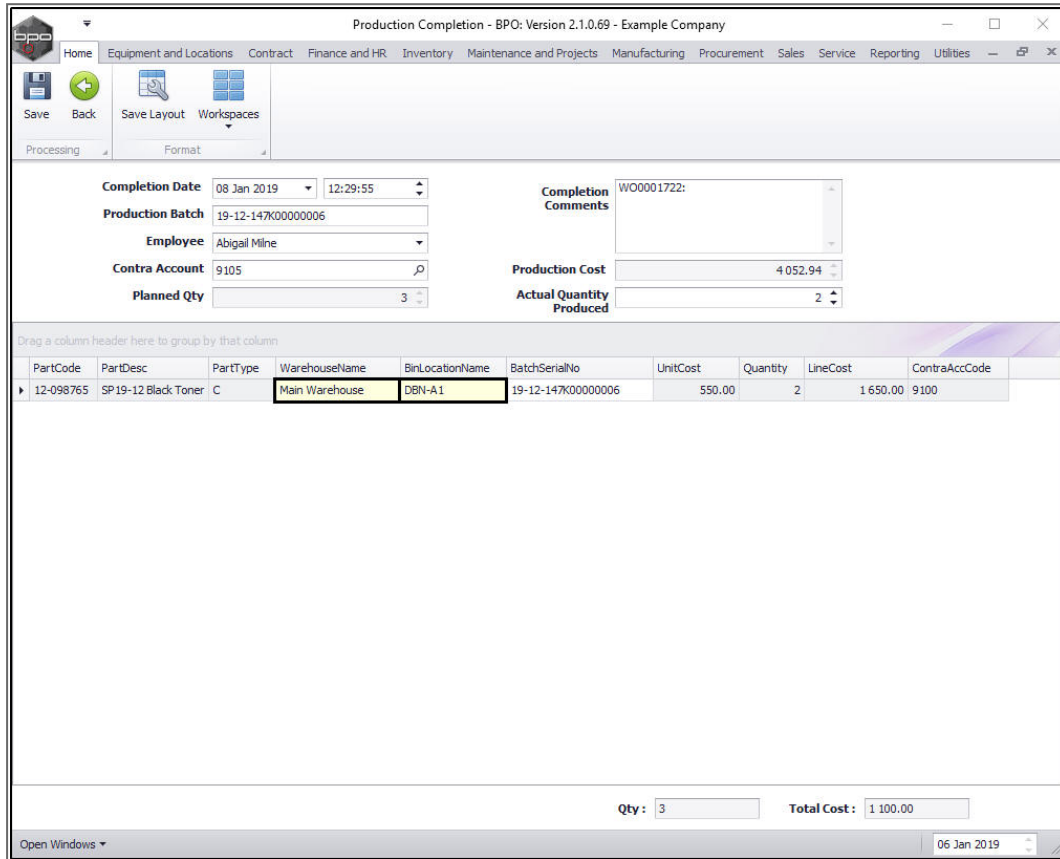

PartCode	PartDesc	PartType	WarehouseName	BinLocationName	BatchSerialNo	UnitCost	Quantity	LineCost	ContraAccCode
12-098765	SP 19-12 Black Toner	C	Main Warehouse	DBN-A1	19-12-147K00000006	550.00	2	1 650.00	9100

SELECT AN (ALTERNATIVE) RECEIVING WAREHOUSE AND BIN – C-CLASS PRODUCT

You can **select** a receiving warehouse and bin or **change** the receiving warehouse and bin, if a default one has been set up on the part.

In this example, there is a default warehouse and bin already set up on this part code.

- Follow the same process: **Select an (Alternative) Receiving Warehouse and Bin** as explained above for an A-Class item.

BATCH/SERIAL NUMBER – C-CLASS PRODUCT

- You will note that the **Batch Serial No** text box is already populated with a batch number for this batch of C-Class items. This is because **Auto Serial No** was selected, if this setting was not selected, the **Batch Serial No** text box would be blank and you will have to type in the batch number.

VIEW STOCK GENERATED - C-CLASS PRODUCT

- You can view the stock generated in the [Stock Status](#) screen.

Ribbon Access: *Inventory > Stock*

The **Stock Status** screen will be displayed.

1. Ensure that you have selected the **site** that the receiving warehouse is in and that the **status** is set to **In Stock Only**.
2. Click on the **drop-down arrow** in the **Warehouse** field to select the receiving warehouse.

The Selected Warehouse frame will populate with the **Type**, **Description** and **Codes** of all the parts in stock.

- Use the **Filter Row** or scroll down the list to find the produced part.
- Click on the **expand** button in the row of the part.
