

HUMAN RESOURCES

INTRODUCTION TO CRAFTS

- The **Crafts** application in **Nucleus Service** is a way of classifying the **skills of employees**.
- You have to first set up **Crafts** in **Nucleus Configurator**, [Static Data Crafts](#), before you can [add](#), [edit](#) and [delete](#) Crafts in **Nucleus Service**.
- When you [add a new employee](#), each employee can be assigned **more than one Craft** per Site / Branch but **only one** of those **Crafts** can be set as the **Primary Craft**.
- When you [assign](#) a **Craft** to an employee, you can plan resources required for upcoming work, and the employee's time will be booked and charged out against the **Craft**.
- [Tasks](#) can be linked to **Crafts** to ensure that the right employee with the right skills and qualifications is assigned to the right job - this is set up in [Assign Internal Labour Resource](#).

Ribbon Access: Finance / HR > Crafts

CRAFTS ACTION BUTTONS

- Select **Crafts** to:
 - [Add](#) a Craft
 - [Edit](#) a Craft
 - [Delete](#) a Craft
