PROJECTS

INTRODUCTION TO PROJECTS

A project is a collective group of jobs that need to be carried out.

The Project module is a tool for users to collectively view the work to be done under a project, to manage timelines and project schedules.

By monitoring the project, you can keep track of work that has been done and work that still needs to be done.

You can **invoke** a project when complete.

You can create a **New Deal Sale** or **New Deal Rental** Project from a Sales Order.

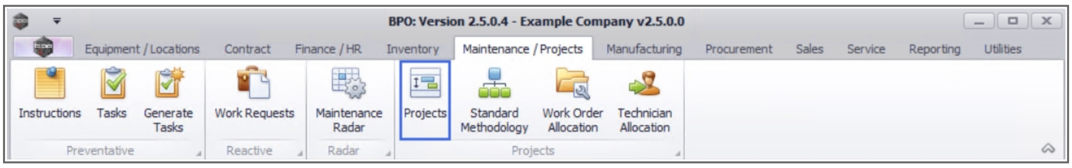
Projects are either **Open** or **Closed**. Once closed, a project cannot be re-opened.

Use BPO to Projects - Add Main Project or use Projects - Work Orders to create a project for Maintenance Planning work orders.

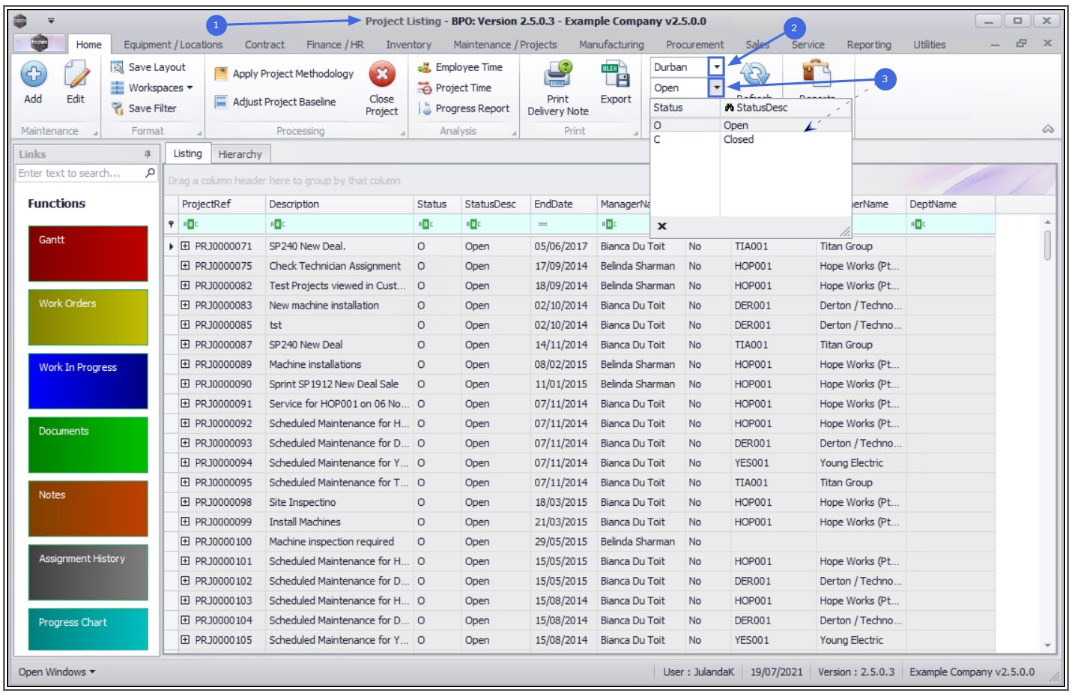
Project Static Data Setup

- Project Contact Type
- Project Methodology Class

Ribbon Access: *Maintenance / Projects > Projects*



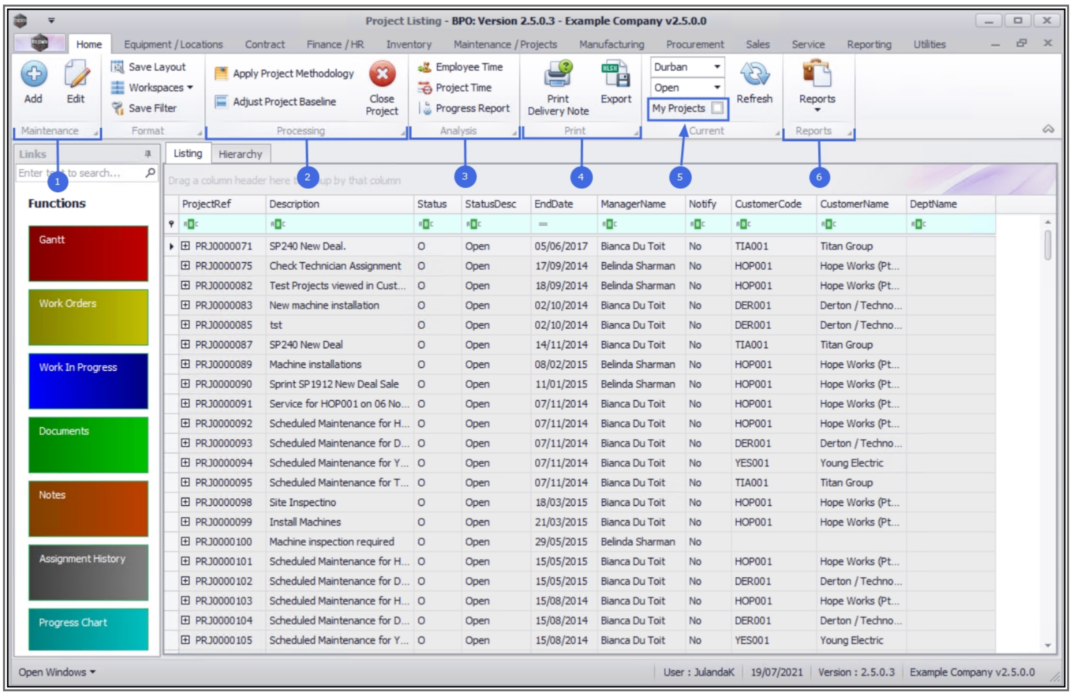
1. The ***Project Listing*** screen will be displayed.
2. Select the ***Site*** that you wish to work in by clicking on the down arrow and selecting the required site
    - The example has ***Durban*** selected.
3. The Project ***Status*** can either be set to ***Open*** or ***Closed***.
    - The screen will open by default in the Open status as you will most likely be working in this status.



PROJECT RIBBON

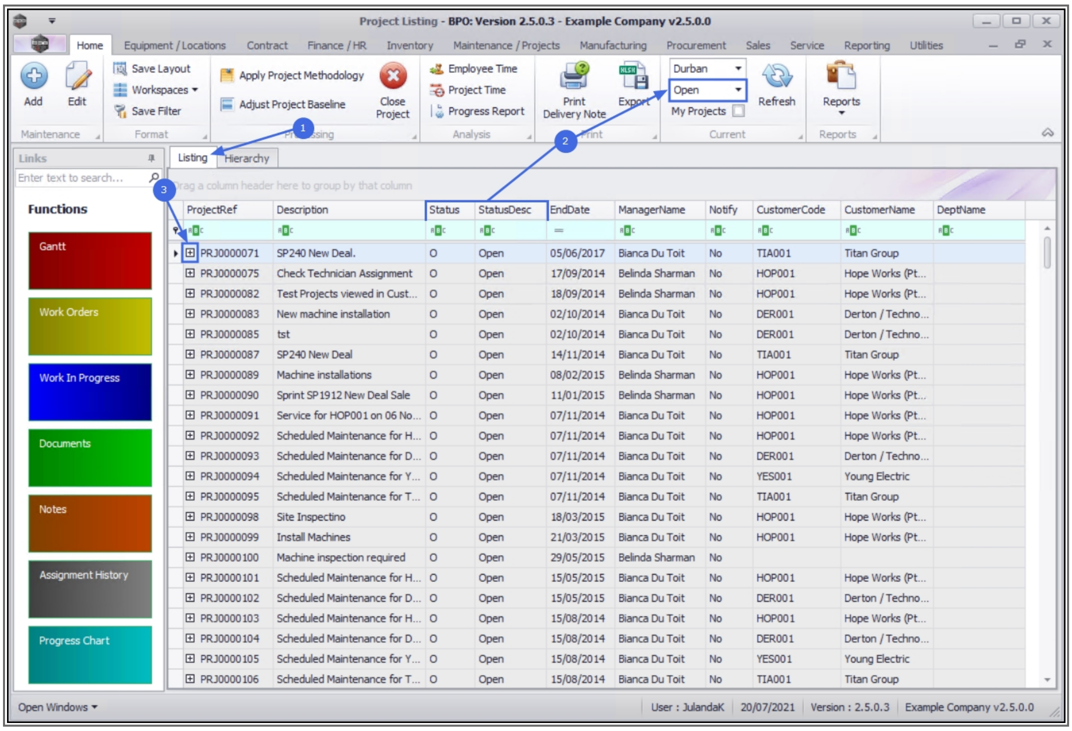
1. From the **Maintenance section** you can Projects - Add Main Project and / or Projects - Add Sub-Project. The Projects - Edit Project function allows you to make changes to project information as well as link digital documents, invoices, book time, etc. to the project.
2. From the **Processing section**, you may choose to Projects - Apply Project Methodology, Projects - Adjust Project Baseline or Projects - Close Project.

3. From the **Analysis section**, you can generate and view the Projects - Employee Time Sheet, the Projects - Project Time Report or generate a Projects - Progress Report for the project.
4. From the **Print section**, you can Projects - Print Delivery Note for the Project, or Export the Project list to an Excel Spreadsheet.
5. From the **Current section**, click on the Projects - My Projects check box to filter the project list by the projects that are ***assigned to you*** (the person currently logged on the system).
6. **Reports** allow you to print Project Reports.

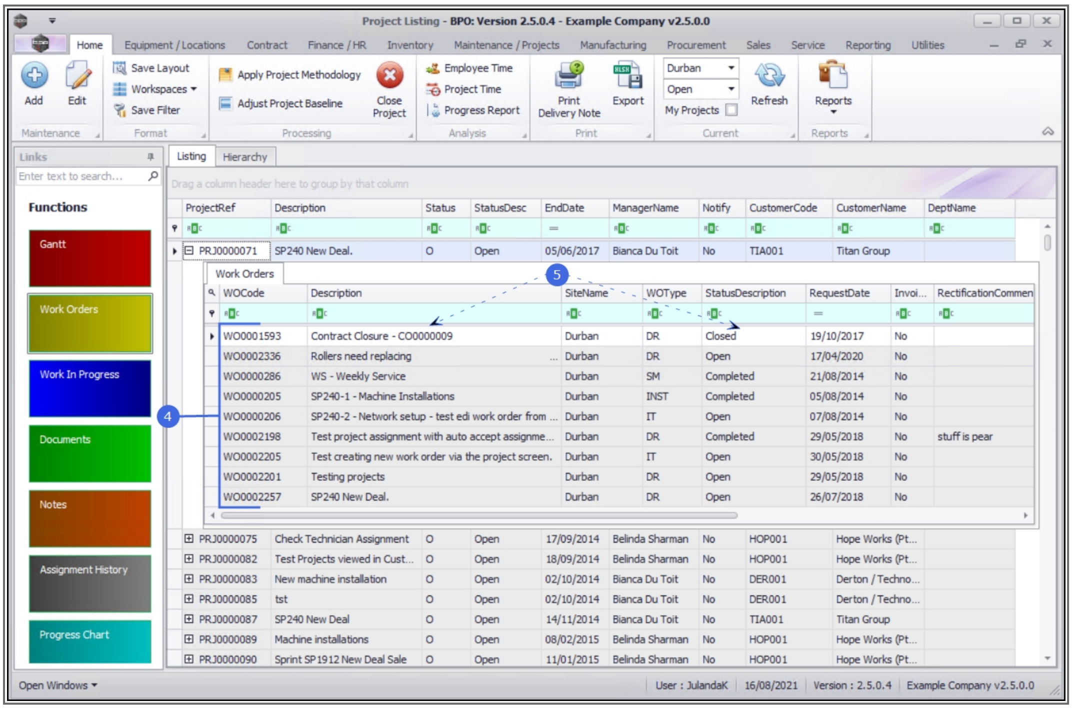


PROJECT LISTING FRAME

1. The Project Listing screen will by default open on the ***Listing frame***.
2. The projects listed in this frame will be filtered using the ***Status filer*** that was selected.
3. You can click on the ***expand button*** in front of a project to ***view*** the work orders linked to the project.



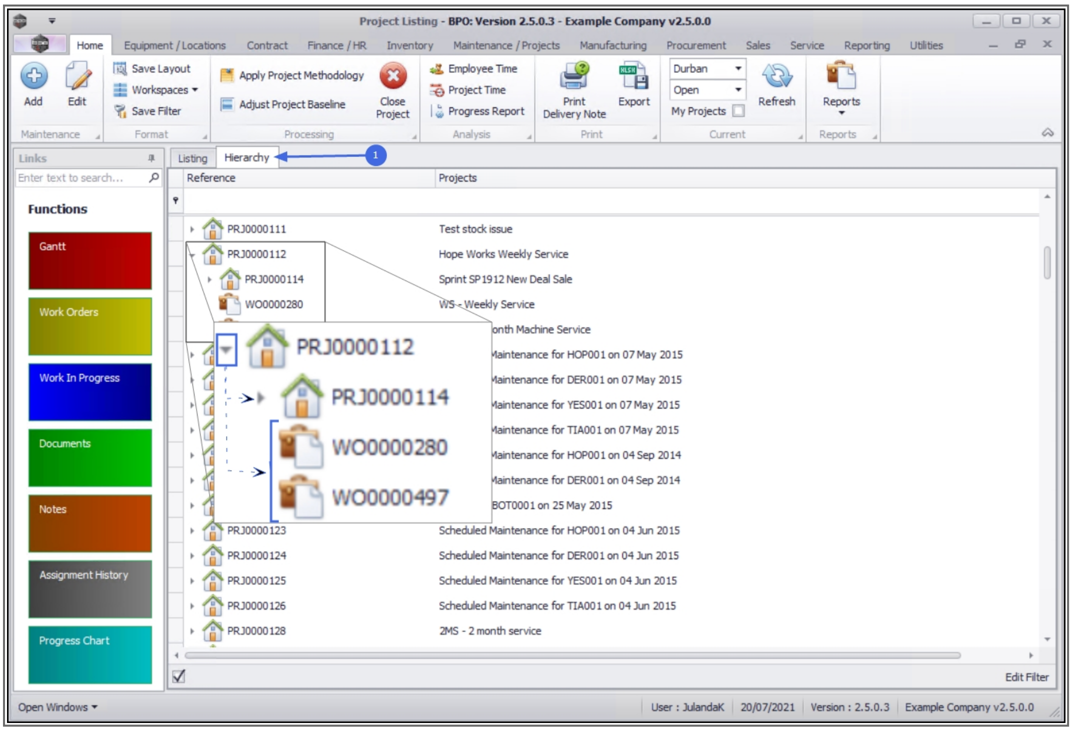
4. The ***Work Orders*** frame will expand to display the list of work orders.
5. ***Double click*** anywhere in the ***row*** of the work order, to open the ***Maintain Work Order*** screen where you can view more details for the work order.



PROJECT HIERARCHY FRAME

1. The ***Hierarchy*** tab allows you to view the projects in a ***tiered*** order.
2. Click on the ***tree view chevron*** node in front of a project to expand any sub-projects[1] and Work Orders attached to the project.

[1]A sub-project may also be referred to as a nested relationship project



FUNCTIONS TILES

The ***Functions*** tiles will direct you to further information for a selected project.

These tiles are available from the ***Project Listing*** as well as the ***Edit project*** screen.
