

## CRM BASICS

### RECOMMENDATIONS

Recommendations are notifications that that you can view and follow up on. For example, you may receive a notification that a [Rank Call is due](#), or a contract is about to expire or contact's birthday is coming up. These notifications will trigger the Salesman to take action in response to a Recommendation. For example, he may email the customer to wish them a happy birthday or send a competitive quote to a customer whose third party contract is about to expire. Both of these response actions improve relationship with the customer, who in turn may increase the customers faith in the Salesman to 'look after' them thereby increasing business potential.

You can configure which Recommendation Types to use from within **BPO**.

### CRM RECOMMENDATION ENGINE

- The **CRM Recommendation Engine** must be installed and configured on the server, and be set up to run nightly via the **Windows Task Scheduler**.
- A [full list](#) of Recommendations can be accessed from the **Dashboard (Home page)**. [Client specific](#) Recommendations can be accessed from the **Customer Home page**.
