

SECURITY

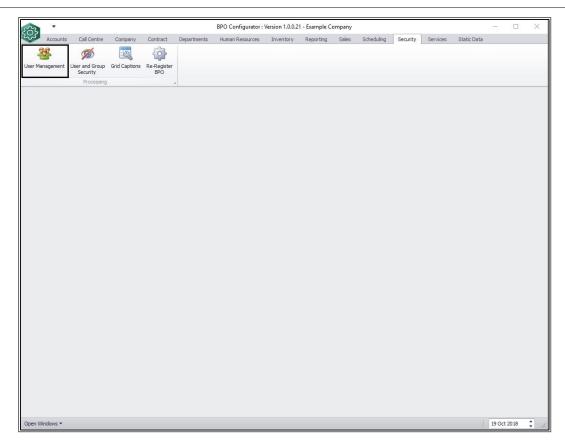

USER AND GROUP SECURITY - CREATE A NEW GROUP

If you are setting up a **new** group from scratch, it is a good idea to set the *'Company Modules: Site' Access Type* first, otherwise you cannot assign a user to this group you have created, and the user will not be able to log into BPO.

Set the site (branch) security dependant on which sites the user may have access to.

Ribbon Access: Configurator > Security > User Management

- The *User Management* screen will be displayed.
- Click on Add Group.

• When you have finished adding the User Details, click on *Save*.

Note: The Group Details frame is *un-editable*.

 You will return to the User Management screen where you can now view the new group.
