- Click on the 'Add Record' button

- The Rental Calculator screen will come up.
- Click on the 'Save Record' button.
  - **Note:** This calculates the Rental amount. It does not add or adjust your current rental fee. You will still need to add a Rental Fee on the Contract Item.
  - This Rental Information History is required in order to use the 'Interest Rate Adjustment' functionality.
- Add a **Note** to define this rental structure.
- **Rental Factor:** Type in a rental factor, if required. Select 'Compute' - this will calculate the Contract Value with the rental factor for the 'Applied Rental'.
- **Computed Rental:** This field will populate when you select the Order No. Any changes to the Contract Value, etc. means you'll need to click on 'Compute' to recalculate this field.
- Type in an **interest variance**, if required.
- The **Interest Rate** is populated by the latest effective interest rate configured on the system.
- The **Rental Period** pulls through from what is configured on the contract.
- The **Sales Order** and **Contract Value** will pull through. You can change the contract value if required.
- Search for and select the 'Sales **Order**' for the New Deal that was raised to create this contract.
