

CONTRACT

TRAVEL RADII

Travel Radii or Travel Zones determine a set fee to charge a client for travel within a certain range of kilometres.

You need to set up an expense allocation: **TVCH** as the expense allocation code, to ensure the allocation matches with the travel radii.

Notes on Billing:

Contracts

If you wish to include travel on a contract, set the travel distance on the Contract Item to '0'. If you do not wish to include travel, and thus bill any travel costs incurred, then set the actual travel distance on the contract item. See [Contracts: Creating A New Contract - Link Travel Radius](#) for details on how to add a travel radius to a contract item.

Non-Contract Machines

If you wish to bill travel on a machine each time a call is logged, set the travel distance on the machine detail. See [Assets: Editing Assets](#) for how to add travel distance to a machine. If you do not wish to bill travel every time a call is raised against a machine, set this travel distance on the machine detail to '0'.

Once -Off Travel Charge

If you then wish to bill a **'once-off'** travel charge, add travel on the invoice by selecting the **'TRVL'** item type and then selecting the zone you wish to bill. See [Sales Invoices: Add a Sales Invoice - Add An Item Type - Travel \(TRVL\)](#) for details on how to add a travel charge to an invoice.

Ribbon Access: *Configurator > Contract > Travel Radii*

The ***Contract Travel Charges*** screen will be displayed.

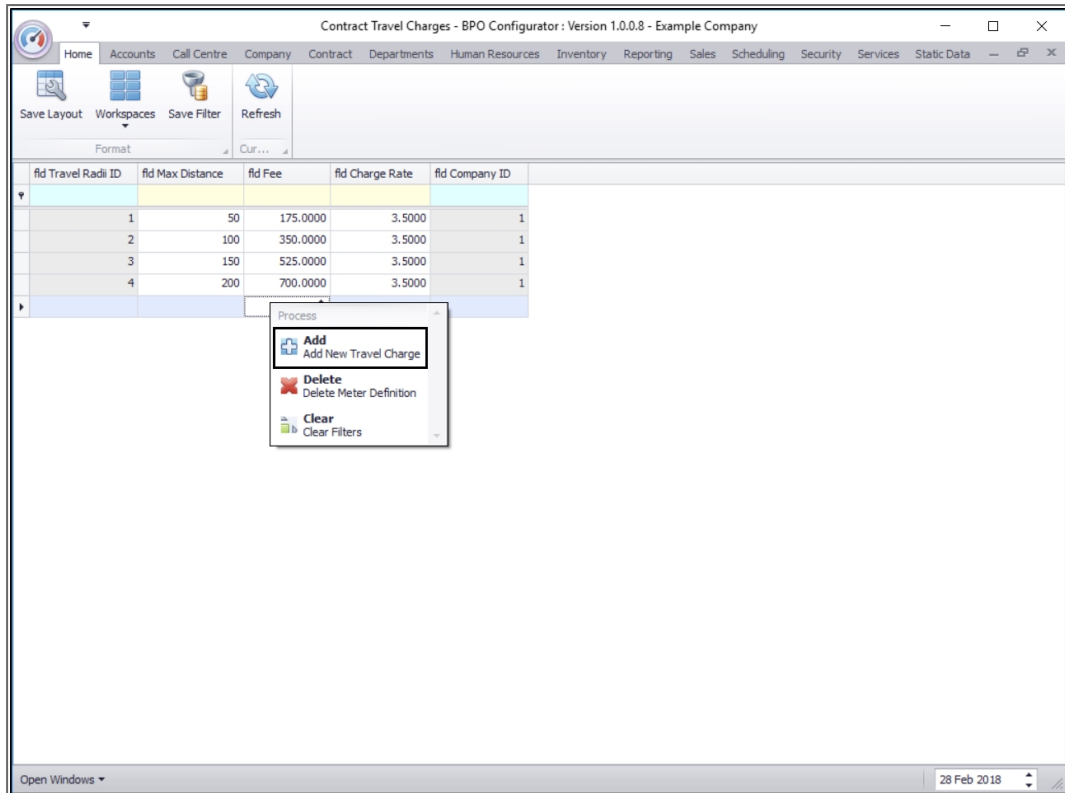

- In this image, you can see that **4** travel rates have already been set up.

- A **Save** message box will pop up asking;
 - ***Are you sure you want to save changes to this Contract Travel Charge?***
- Click on **Yes**.

The screenshot shows the 'Contract Travel Charges - BPO Configurator' application window. The title bar indicates 'Version 1.0.0.8 - Example Company'. The application has a ribbon menu with tabs for Home, Accounts, Call Centre, Company, Contract, Departments, Human Resources, Inventory, Reporting, Sales, Scheduling, Security, Services, and Static Data. The 'Home' tab is active, showing options for Save Layout, Workspaces, Save Filter, and Refresh. Below the ribbon is a table with the following data:

fld Travel Radii ID	fld Max Distance	fld Fee	fld Charge Rate	fld Company ID
1	50	175.0000	3.5000	1
2	100	350.0000	3.5000	1
3	150	525.0000	3.5000	1
4	200	700.0000	3.5000	1
0	250	875	3.5	1

A 'Save' dialog box is open in the center of the window, asking: 'Are you sure you want to save changes to this Contract Travel Charge?'. The dialog has three buttons: 'Yes', 'No', and 'Cancel'. The 'Yes' button is highlighted with a black border. The status bar at the bottom right shows the date '28 Feb 2018'.

The new travel charge will be saved.

- **Note:** You will see that the un-editable fields: Travel Radii ID and Company Id have now been allocated by the system.
