

INSTALLATION

BPO MCONNECT

- BPO_MConnect will get meter readings from FMAudit and populate the Meter Reading in Unprocessed Meters.
- The meter reading will not be loaded if the current reading is less than the prior reading.
- I nstall BPOMConnect on the server. Install location: C:\Program Files (x86)\CO3 Technologies (Pty) Ltd\MConnect
- Ensure that the Environment file is configured with the correct Service Manager Environment and FMAudit Login details. After the initial application run, the FMAudit username and password will be encrypted.
- Add the same FMAudit URL (from the environment file) to the MConnect config file.
- Check that the correct permission have been set on the 'Log' folder - 'C:\Program Files (x86)\CO3 Technologies (Pty) Ltd\MConnect\Log'
- Ensure that the correct Meter Definition Codes are configured in the MeterNameMapping file.
- Add a Scheduled Task in Windows to run the BPO_MConnect application once a day.
- <u>RSI Service Manager</u> must be installed and configured

Access: Server > Windows

INSTALLATION

- Run the 'BPO_MConnect' Installation file
- With increased Windows security, you may need to run the installation from the accompanying 'setup' file.
- It is recommended that you start the installation with: 'Run as Administrator'

- The BPO_MConnect Setup Wizard will begin
- Click on the 'Next' button

 The default location for installation is: C:\Program Files (x86)\CO3 Technologies (Pty) Ltd\MConnect. It is recommended that you keep this default location. Keeping a standard will make upgrades easier.

- Ensure that 'Everyone' is selected for the install.
- Click on the 'Next' button.
