	Total 0												

This is primarily due to the information in the row not being registered by the system until the user has <u>completed</u> the row.

Fix

- i. Click **OK** on the error message to clear it.
- ii. When you have finished adding the mandatory content to the relevant columns in the row
 - either,
- iii. press **Tab** until you have moved across each column and a new row is created

• or

- iv. press **Enter** on your keyboard which will create a new row.
- v. You will then be able to *Save* the information.
