## SERVICE

### INTRODUCTION TO WORK ORDERS

A **work order**, or job card is an order for work to be performed for a **Company** or a **Customer**. All transactions concerning this work, such as part issues, labour time, etc. are logged against the work order.

When work is required for a **Customer**, a **Call** is raised. The system will generate a work order in the background. Transactions are logged on the call, but stored against the work order. More than one work order can be linked to a call, for example, when different tasks needs to be performed to complete one call.

When work is required for a **Company**, such as Building Maintenance or a Machine Repair, then a work order needs to be raised **manually**.

- If the work is for Building Maintenance, or Training, then the work order must be linked to a **functional location**, which must be set up before hand.
- If the work required is for an **asset**, e.g. repair a machine in store to be sold refurbished, then the machine is linked to the **call**.
- **Manual** work orders can be linked to a **project** to group them, e.g. at the beginning of the year create a project for 'Non Stock Company Purchases', create a work order each month to raise non-stock requests and transactions. Each work order is closed at the end of the month and the project is closed at the end of the year.

- This is good practice for when logging a great deal of transactions through manual work orders.
- If not, stick to one work order per requirement, e.g. Training, Maintenance, and keep the work order open.

## Ribbon Access: Service > Work Orders

1. The **Work Order Listing** screen will be displayed.
2. Select the **Site** you wish to work in.
  - The example has Durban selected.
3. The screen lists all **Open** work orders by default.
  - Select the work order status you require.

### Work Order Status

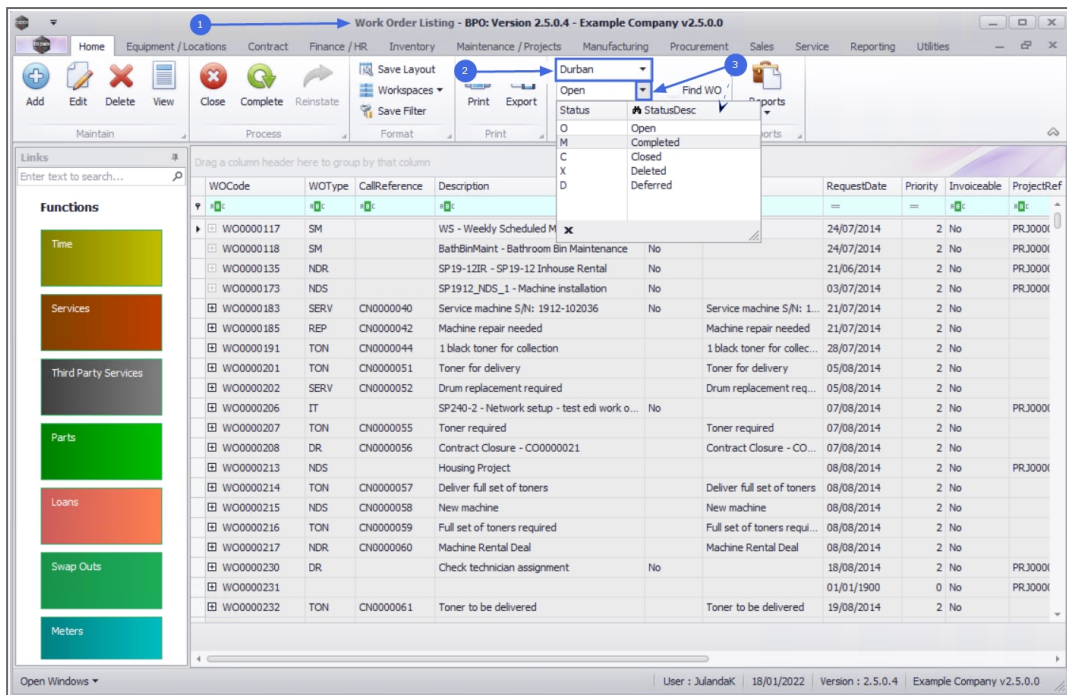

O - Open - work is yet to be done

M - Completed - work is done, but not signed off (to be used only with manual work orders)

C - Closed - work is done and signed off

X - Deleted - work orders that have been deleted

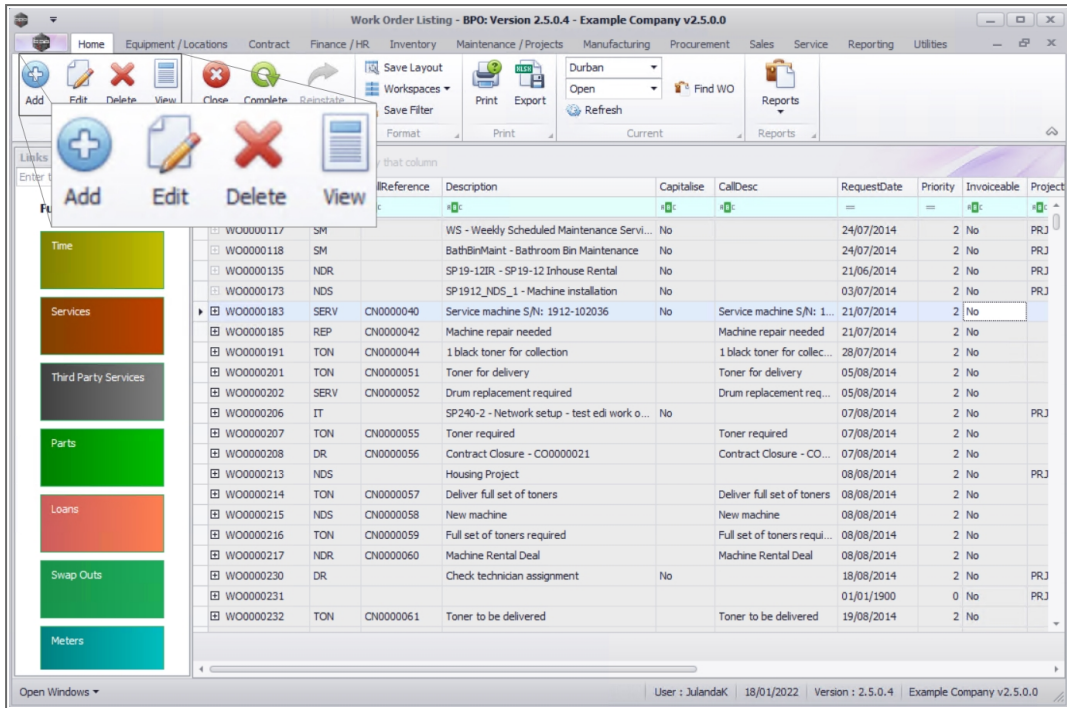

D - Deferred - work orders that have been placed on hold

## RIBBON ACTION BUTTONS

The Work Order ribbon action buttons will be available (bold) or unavailable (greyed out) depending on the status selection.

Use the Maintain buttons to [Add](#), [Edit](#), [Delete](#) and [View](#) a work order.

Use the **Process** buttons to **Close**, **Complete** or **Reinststate** a selected work order.

The **Print** button will generate a Work Order Report for the selected work order. Use the **Export** button to export the list of Work Orders in the required status to an Excel Spreadsheet.

Use **Find WO** to search for a specific Work Order by typing in the Work Order number.

Click on **Reports** to select Custom Work Order report(s) from the reports drop-down menu.

## FUNCTION TILES

The Functions panel is also available from the [Work Order Listing](#) and the [Maintain Work Order](#) screen.

The [Times tile](#) will direct you to the Time bookings for WO screen where you can **Add, Edit Delete** and **Export** the time logged against a work order. Refer to [Work Orders - Time Booking](#)

The [Services tile](#) will direct you to the Internal Services for the selected Work Order screen where you can **Add, Edit** and **Delete** an internal service from the work order. Refer to [Work Orders - Internal Services](#)

The [Third Party Services tile](#) will direct you to the Service Requests for WO Code screen where you can **Add, Edit, Delete** and **Export** service requests logged against the work order. Refer to [Work Orders - Third Party Service Request](#)
