COMPANION APPS

INTRODUCTION TO BPO AUTO CALL INVOICE SERVICE

(RSI_AutoInvoiceService)

Requirements

- RSI v1.24.0.5 or later.
- The call must either originate from a Sales Order with a valid salesman, or be a service call with a technician linked.
- For the call to be review by the service for auto invoicing, the call and underlying work orders(s) should be set to status 'Complete'.
- Can be used in conjunction with:
 - RSI_AutoComplete
 - RSI_CloseCallService applications.

Remember that if you use RSI_CloseCallService: the following is required:

- the BPO_PostingEngine must be installed and configured
- Cannot be used with 'Enforce Error Code on Call Closure' set to Yes
- If the company configuration 'ReadingRequired' is set to yes – a call or its underlying work order(s) cannot be closed without adding a meter reading to the call or underlying work order.

Introduction

BPO_AutoCallInvoice attempts to automatically invoice items for completed calls. A Daily Scheduled Task is created during installation to run BPO_ AutoCallInvoice at 2:00am every day. Any completed calls that cannot be invoiced are added to a tsv file that can be opened in Microsoft Excel. This exception list includes call summary information and the reason the call cannot be invoiced so that it can be resolved for invoicing.

Completed calls that have no outstanding items and have billable items will be invoiced. The invoice status will be set to 'New' and will need to be printed and emailed to the client as required.

A message will be emailed to the selected person in the AutoCallInvoice static data file, for calls that have items outstanding, such as un-actioned Part Requests etc.

INSTALLATION

- Double click on the 'BPO_AutoCallInvoice' install file.
 - Note: Check that you have the latest version.

- The Installation Wizard will open.
- Click on Next.

EXAMPLE EMAIL

A message will be emailed to the selected person in the BPO_ AutoCallInvoice static data file, for calls that have items outstanding, such as un-actioned Part Requests, etc.

Please note that the auto invoice process was unable to generate an invoice for call CN0000144.

Please attend to this call so that it can be invoiced.

There are still open part requests which need to be actioned. Please action these items before invoicing.

Thank you
