## ACCOUNT DRIVERS - SUPPLIER INVOICE -BACK TO BACK

An accounts driver is an event that will check the transaction you are busy with on Nucleus Service and verify whether there is a financial effect to be posted to Nucleus Accounts or Sage Evolution. Refer to the <u>Account Driver</u> <u>Introduction</u> manual for more information.

The example below is based on the Non-Segmented 'Base' General Ledger.

### SUPPLIER INVOICE - BACK TO BACK (SIBB)

After a Back to Back Contract Invoice is raised, a Back to Back Supplier invoice must be processed in order to pay the financed amount to the finance house. The Finance amount is cleared from the Back to Back Provision account and posted to Supplier Control.
