UTILITIES

TILE, CASCADE, HORIZONTAL VIEW

When you have multiple screens open in Nucleus Service, to make it easier to view all the screens you are working in, you can use the **multiple view** option.

You can choose to view your open screens in either:

- Tile View
- Cascade View
- Horizontal View

Any grey screens will be **inactive**.

Any **active** screens in each view can be worked in as if they were fully open screens.

Each of the **active** screens can be **expanded** by clicking on the edge of the screen to reveal the double ended expansion arrow, then dragging this arrow to **expand** the screen to the size of your choice.

You can also click on the **maximise** icon in the top right hand of the screen you are working in to enlarge the screen.

When you **maximise** the screen, it removes the secondary ribbon toolbar and pushes it into the **Home Tab** at the top.

Click and drag on the screen of your choice to move it around your display screen.

Ribbon Select: > Utilities > Tile / Cascade / Horizontal

• In any screen you are working in, click on the **Utilities** tab.

TILE VIEW

- In the action button toolbar, select **Tile**.
- Your screen will now be divided into as many tiles as the screens that you have open.
- In this image, there are 3 open screens and now 3 tiles are displayed.
