VIEW, ADD, EDIT, DELETE SHIFTS

Setting up shifts is important for [Workload Scheduling](#) and [SLA Monitoring](#).

1 normal work week shift is required for technicians and SLA monitoring.

Additional shifts can be added for customers that have different trading hours, and subsequently linked to the relevant employee(s).

Normally, shifts will have **7** days (for a standard week).

The **Shifts** docking panel lists all the shifts assigned to the **selected** employee.

Ribbon Access: Finance / HR Employees

The **Employees** listing screen will display.
