SALES

CUSTOMERS - INVOICES

The **Invoices** tile from the Customer Listing screen will allow you to Add, Edit, Comment and Reference, View and Print an Invoice.

Sales Invoices may have been created from other screens within BPO (such as Calls or Projects), but all Sales Invoices created for the selected Customer will be listed here.

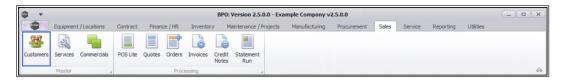

If a Sales Invoice is created from this screen without linking to a related project, call or work order, that invoice is classified as OTC (Over the Counter).

OTC (Over the Counter) Invoices are sales invoices that are created without going through the New Deal Sale process (and therefore the costs are not managed via Work In Progress). This is best used for a Shop Sale environment where a customer is invoiced before the stock or service is collected. This would be for a quick stock sale or internal service. Where delivery, third party services or time would be spent on work, installation or implementation, it is advised to rather follow a New Deal Sale process. A Sales Quote or Sales Order can be converted to a Sales Invoice, or a Sales Invoice can be created directly. Where stock is invoiced, a part request is created so that the stock can be issued to the invoice - its imperative to have strong controls in place to ensure that stock is issued by the store person. For a simplified OTC Invoicing process for stock items, see POS Invoicing.

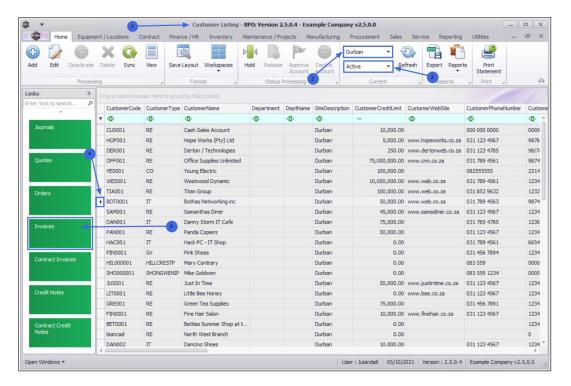

The Issues Functions tab will display stock that is issued to the invoice, where it is an OTC Invoice.
