SERVICE

WORK ORDERS - SWAP OUTS

The system will need to be configured in order to process machine swap outs.

A default **Buy Back** supplier and **Sell Off** customer will be need to be configured for this processing.

Machine swap out processing is <u>not</u> generally advised. If you are interested in using this process, you will need to follow this up with CO3 Technologies.

When raising the swap out, you will need to select the **original machine**¹, and the **replacement machine**².

BPO2 will process the **buy back** for the item that is returning to store, and the **sale** for the item that is going out to the client.

This process is predominantly used to swap out **accessories** linked to machines on contract. The original item will be removed from the contract and the replacement item will be linked to the contract.

This process preserves the fees, but not the meters and is <u>not</u> generally recommended for swapping out machines.

Item Swap Out Process Overview

This process is used when a contract remains active, but one or more of the items on the contract are to be <u>removed</u> **and** <u>replaced</u> with another item. For

¹The machine that the call is logged agaist and will be moving into the store ²The machine that is being sent out as replacement for the original machine

example, 3 items (machines) are linked to the contract, but one of the items is faulty and must be replaced with an alternative item.

Swap Outs can <u>only</u> be done via a **Call**.

The documents processed at the end of the Swap out will depend on the Swap Out Configuration set up and what type of asset is going out:

- i. An Internal Asset on Contract
- ii. A Client (Customer) Asset on Contract

and what type of asset is coming in:

- i. A serialised stock item
- ii. An Internal Asset

Ribbon Access: Service > Work Orders

- 1. The Work Order Listing screen will be displayed.
- 2. Select the **Site** where the work order was issued.
 - The example has **Durban** selected.
- 3. Set the Status to Open.
- 4. Click on the **row** of the work order you wish to process a **swap out** for.
- 5. Click on the Swap Outs tile.
