# COMPANY

## PURCHASING CENTRES - ADD PURCHASING CENTRE

The purchasing centre holds configuration and numbering conventions for procurement transactions.

The purchasing centre can be set up in two ways:

• One global purchasing centre, linked to all branches - document prefix and numbering is globally sequential.

• One purchasing centre per branch - each site will have its own prefix and numbering.

Ribbon Access: Company > Purchasing Centres

- 1. The **Purchasing Centres for Company:** [Company Name] listing screen will be displayed.
- 2. Any existing purchasing centres that have been created for the company will display in the data grid.

## **ADD PURCHASING CENTRE**

3. Click on Add.

Short cut key: Right click to display the Process menu list. Click on Add.

4. The Add New Purchasing Centre screen will be displayed.

#### **PURCHASING CENTRE CONFIGURATION DETAILS**

- **Code:** Type in the **code** that you wish to use for this purchasing centre.
- **Description:** Type in the **description** for the purchasing centre.
- Manager: The site needs to be selected before you can search for the purchasing centre manager. This will be attended to at the end of the process.

#### REFERENCES

The reference section is used to set the **documentation prefixes** and **next number** to be generated by the system at Go-Live.

- Note the Next Purchase Requisition No. has a J (Johannesburg) prefix followed by a PR (Purchase Requisition) prefix and will start with No.1, i.e. JPR1.
- Continue setting the references as required.

• Manually change Purchase Order Status

• **Include Shipping:** Click to select the check box if you wish shipping costs to be added separately to the cost of the parts or items

purchased when you <u>receive goods from a supplier</u>. This is used in conjunction with the <u>Shipping Costs Included Flag</u> functionality on the Supplier.

#### PART ISSUE CONFIGURATION

- Auto Print Picking Slip: Click to select the check box if you wish a picking slip to be generated with a part issue.
- Auto Print Label: Click to select the check box if you wish a label to be printed with a part issue.
- Site Wide Selection of Parts: Click to select the check box if you wish a site wide selection of parts to be available for a part issue.

#### PART REQUEST CONFIGURATION

The auto approve selection you make will affect the availability of the Exclusions and Limitations panel on the right hand side of the screen.

 Auto Approve: Click to select the auto approve check box if part requests (from calls and/or work orders) to store, should automatically be approved.

Note that the Exclusions and Limitations panel is not available for this selection as part requests gets automatically approved.

- Leave the **auto approved** check box **unselected**, if part requests needs to be <u>authorised</u> first before the request is sent to store for stock issue.
  - Ensure that the **Exclusions** and **Limitations** for the part request approval has been set.

Refer to Edit Purchasing Centre for details on how to complete the Exclusions and Limitations frames.

#### STOCK MANAGEMENT CONFIGURATION

- Usage Based: Click to select the check box if you wish the system to calculate stock requirements based on actual usage and supplier lead times.
- Auto Generate Requisition: Click to select in this check box if you wish the system to automatically generate the purchase requisition to maintain stock levels.
- Averaging Period: Type in or use the arrow indicators to set the averaging period. The system will calculate the period in months over which usage is averaged, based on stock levels.
