STATIC DATA

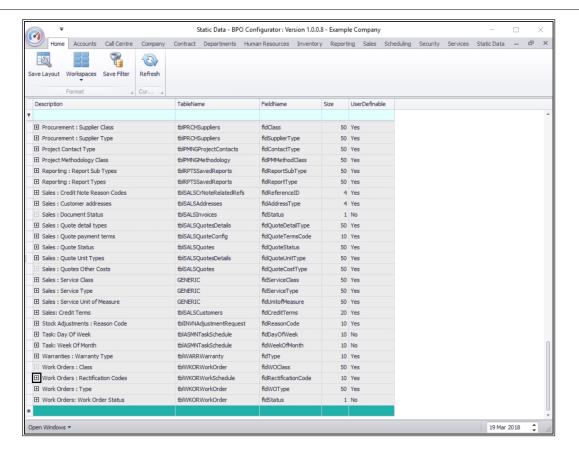

STATIC DATA - WORK ORDERS: RECTIFICATION CODES

Ribbon Access: Configurator > Static Data > Static Data

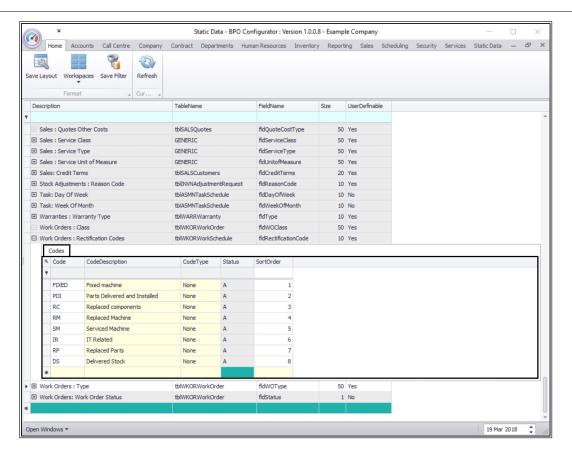

- The Static Data listing screen will be displayed.
- Use the filter row or scroll down the list until you find the Work
 Orders: Rectification Codes row.
- Click on the **expand** icon in this row.

- The Work Orders: Rectification **Codes** frame will be expanded.
- Here you can view a list of work order rectification codes currently on the system.

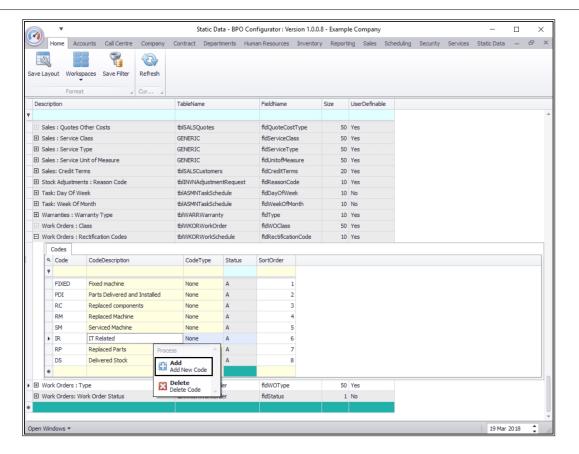

ADD A NEW WORK ORDER RECTIFICATION CODE

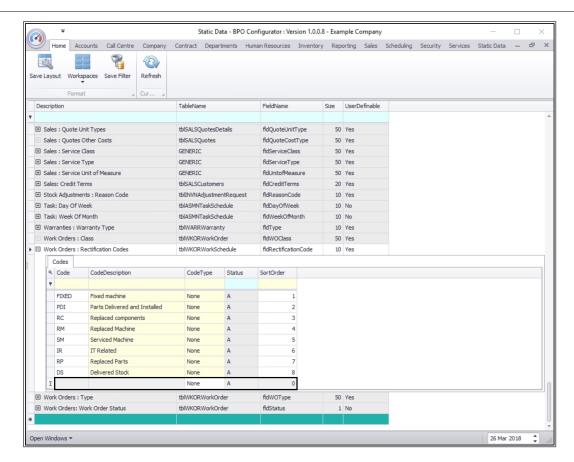

- Right click anywhere in a row of the Codes data grid.
- A Process menu will pop up.
- Click on Add Add New Code.

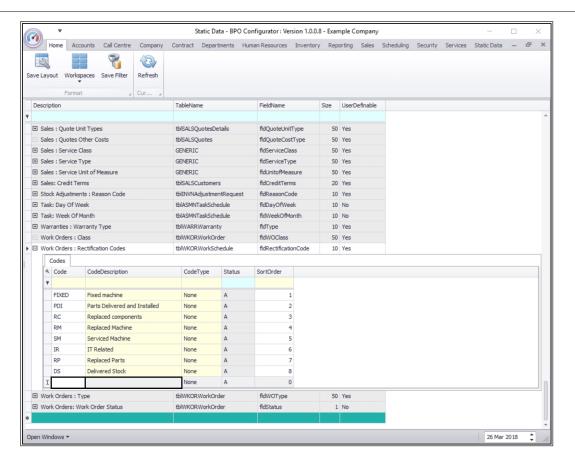

- The **final row** in the **Codes** data grid will now be **'activated'**.
 - The Code Type, Status and Sort Order columns will now be populated.

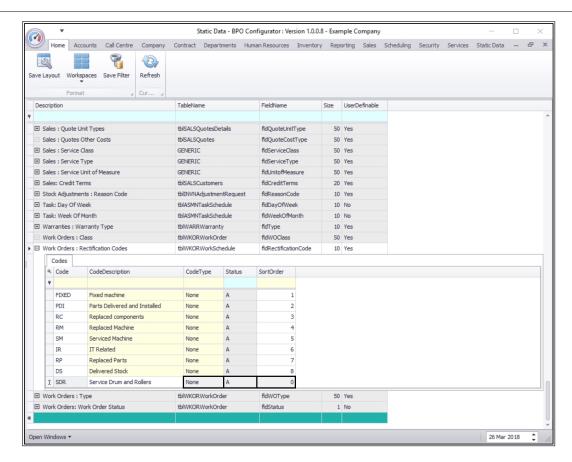

- **Code:** Click in this text box and type in a code specific for this new work order rectification.
- Code Description: Click in this text box and type in a description for this new rectification code.

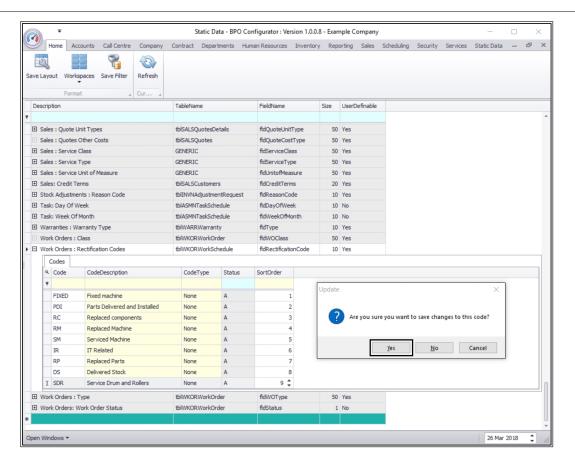

- Code Type: This can remain as None.
- Status: This will auto populate with A Active.
- **Sort Order:** Click in this text box and either type in or use the arrow indicators to select the sort order for this new rectification code.
 - Note: The sort order is the order in which this will appear in the rectification code drop-down list in BPO. If each rectification code has the number 1, then the drop-down list will usually default to an alphabetical order in BPO2. If, as in the next image, it is numbered 9, then it will appear 9th in the drop-down list in BPO2.

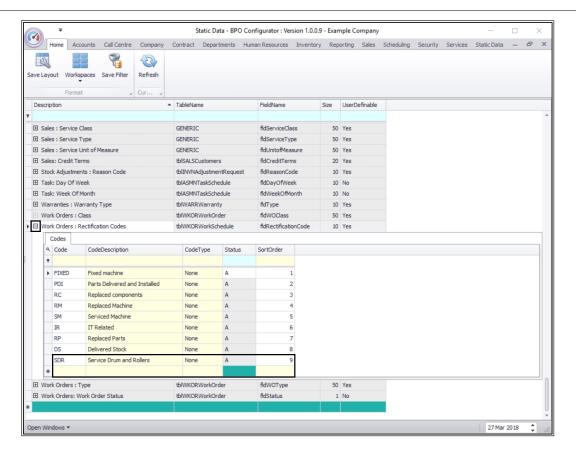

- When you have finished adding the new work order rectification code details, press **Enter**.
- An **Update** message box will appear, asking;
 - Are you sure you want to save changes to this code?
- · Click on Yes.

- The new work order rectification code will be saved and a new row will be added to the Codes data grid.
- Collapse the Codes frame.
