# CONTRACT

### **RELEASE FROM HOLD**

When a contract is placed on **Hold**, the system will prevent call logging, but the customer will still be included in the month end billing.

When the Hold reason has been **resolved**, e.g., payment has been made, then the contract will need to be **released** from Hold and put back into the **Active** status.

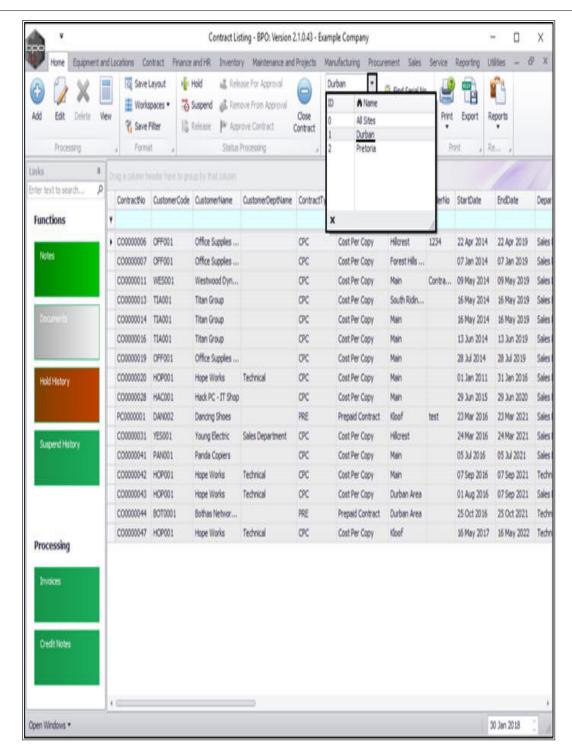

#### **Ribbon Access:** Contract > Contracts

The **Contract Listing** screen will be displayed.

- Select the Site.
  - In this example, **Durban** has been selected.

 Upon opening, this screen will default to the **Active** status, listing all the **Active** contracts for the selected site.

 Click on the drop-down arrow in the status field and select the Hold status.

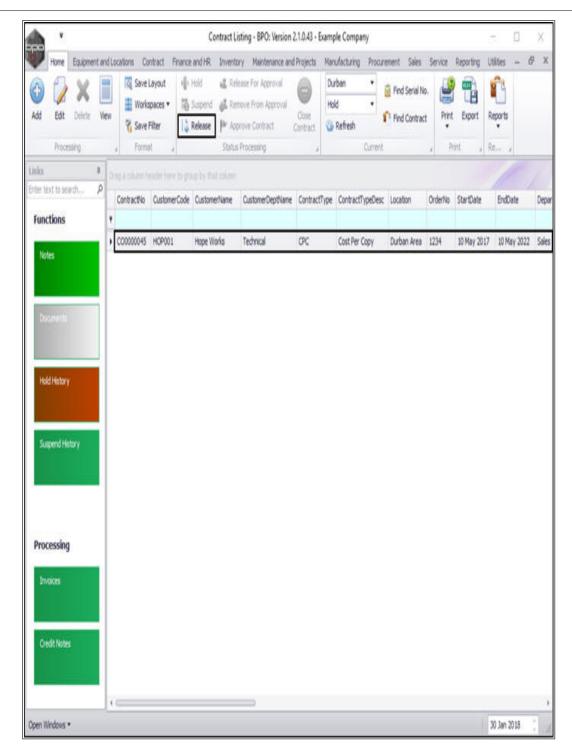

### **SELECT CONTRACT**

The screen will now display all contracts in the selected Site that are sitting in the **Hold** status.

- If there is **more than one contract** in this listing screen, ensure that the **row** of the contract that you wish to release is selected.
- Click on Release.

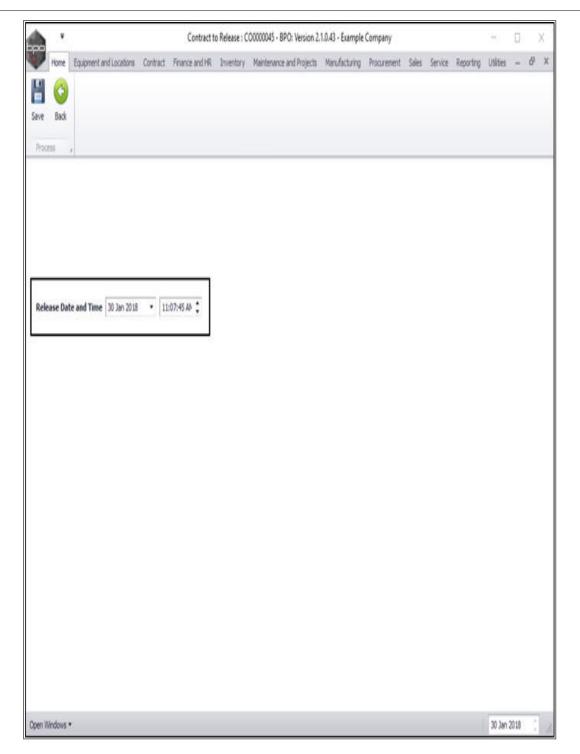

### **ADD RELEASE DETAILS**

The Contract to Release: [] screen will be displayed.

- Release Date and Time: This will auto populate with the current date and time.
  - **Date:** Either type in or click on the drop-down arrow and use the calendar function to select an alternative release date.
  - **Time:** Either type in or use the arrow indicators to select an alternative release time.

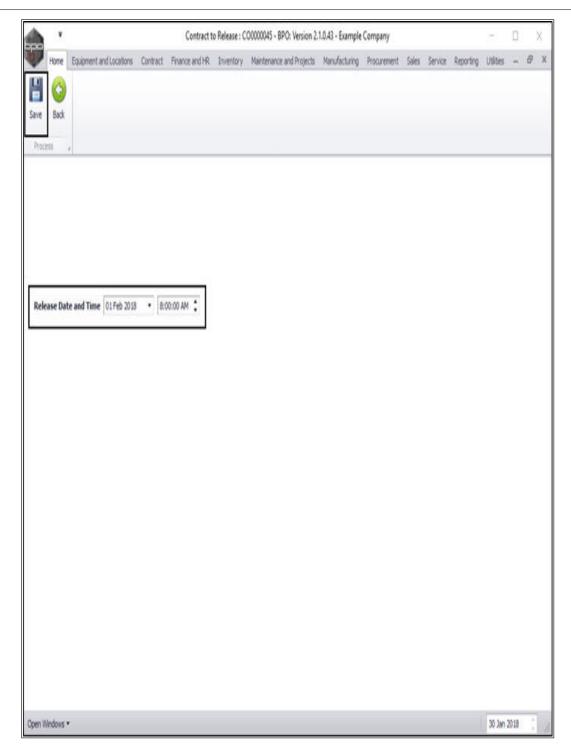

# **SAVE RELEASE DETAILS**

• When you have selected your date and time, click on **Save**.

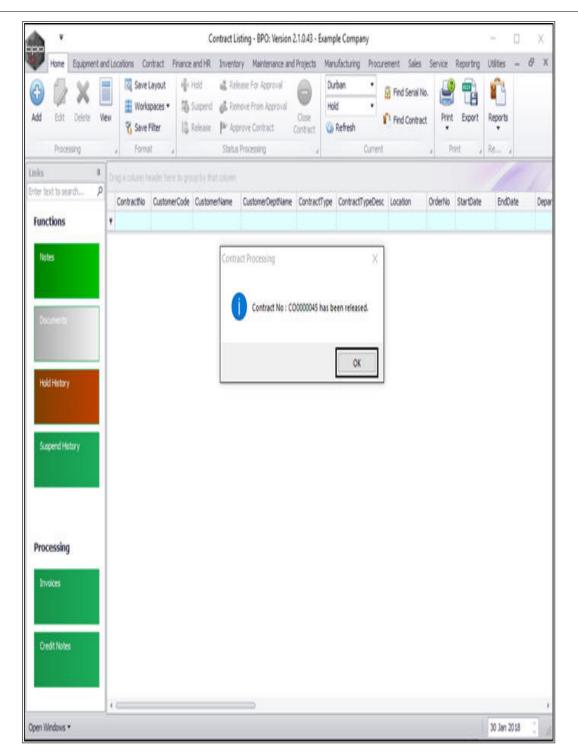

The contract will be **removed** from the Contract Listing screen where the status is set to **Hold**.

- A Contract Processing message box will pop up informing you that;
  - Contract No: [] has been released.
- Click on **OK**.

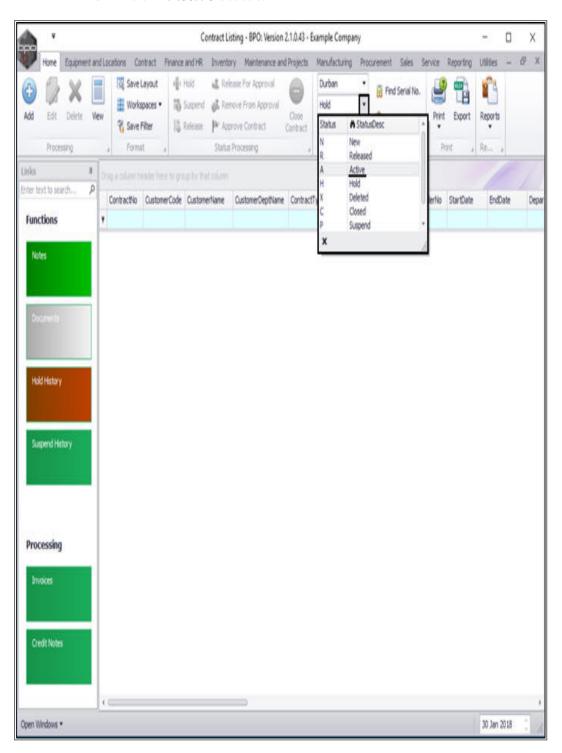

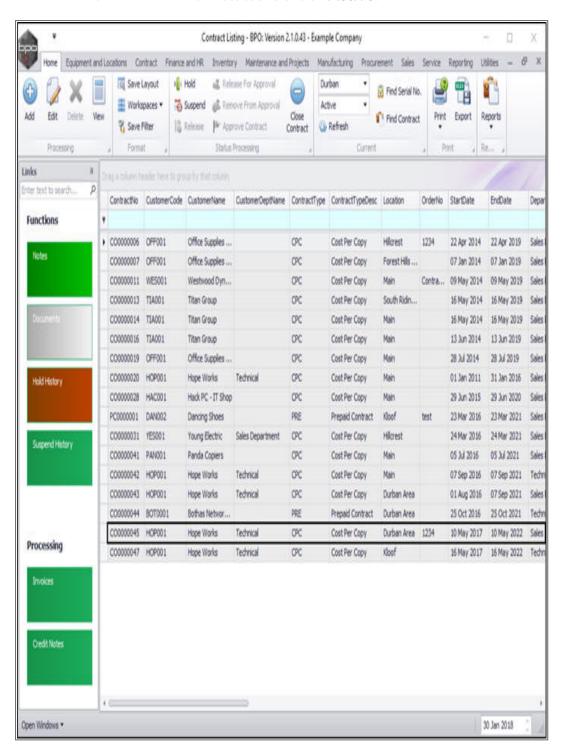

### **VIEW RELEASED CONTRACT IN ACTIVE STATE**

• Select the **Active** status.

 You can now view the released contract in the Contract Listing screen where the status is set to Active.
