CONTRACT

AGGREGATE BILLING CONTRACT

BPO2 now accommodates aggregate billing.

Where the previous aggregate billing work-around was used, with **Aggregate Meter Definitions**, these contracts should now be reviewed and configured as described in the manual below.

Contracts **cannot** be configured for **aggregate billing** where the customer is **consolidated**.

Fees - contract **item fees** are still charged / calculated separately.

Meters

- Meter min (minimum) billing is global per meter **type**.
- An aggregate billing contract only supports a **single billing customer** on meters.

The Aggregate Billing flag can be found in the **Contract Info** panel in the **Add New Contract** screen (when creating a new contract) or the **Maintenance for Contract No.:** [] screen (when editing an existing contract).

Ribbon Access:Contract > Contracts

The **Contract Listing** screen will be displayed.

• To select the **Site** that you wish to work in, click on the **dropdown arrow** and select the relevant site.

AGGREGATE FEES SET UP

If you have **aggregate billing** on item fees:

- Do not select any Item Fee in the Item Fees tab as you would do on a standard contract.
- 2. Instead, click on the **Aggregate** tab.

Set up the fees that need to be aggregate in the **Aggregate Fees** section.

- Marked: Click on the check box in front of the aggregate Fee
 Type to be charged.
 - In this image **S** Service has been selected as an example.
- **Charge Amount:** Type in or use the arrow indicators to select the fee amount to be charged.
- Account Code: This will auto populate with the account code linked to this fee item.
- **COS Account Code:** Type in the cost of sale account code where this fee should be posted to.
- Invoice Description: This will auto populate but you can type in an alternative description to be used for this fee on the invoice. The description will reflect on the contract invoice.

Customer Code and Customer Name

- Only populate these 2 fields if another party (a separate billing customer) is going to pay the **Item Fees** on behalf of the customer.
- If these fields are left blank, **BPO** will bill the customer linked to the contract.
 - Note 1: BPO only supports different billing customers on an aggregate contract from BPO v2.3.0.4.
 - Note 2: Follow the next 4 screenshots only if you wish to link another party as the billing customer.

The **Item Meters** frame will be displayed.

- Note 1: If there are no meters linked to the contract item, you can complete setting up the contract and link the meters and meter charges afterwards by following these 2 steps:
 - 1. Assign meters to the contract item
 - 2. Add the meter charges to the contract item
- Note 2: To avoid linking up meters to items every time you want to add items on a contract, link meters to the part codes of the items. This way, when new items are received / adjusted into stores, they will already have meters linked to them. This will not apply to items that are already in stores prior to this step.

Populate the following fields:

• Marked:

- 1. Select the same meter type
- 2. as you selected in the **Item Meters** frame.
 - In this image the **Mono** meter has been selected.

cationDesc k
k
k
OSAccountC
BC.
OSAccountC
o c

- Min Billing: Type in the minimum billing amount (in Rand value).
 - In this case, minimum billing is global per meter type. This means a fixed price is charged on the sum of all copies made (from 0 up to and including the Minimum Quantity) per meter type on all contract items included in aggregate billing.
 - For example in this image, a minimum billing fee of R500 for a minimum quantity of 1000 copies on a mono meter means R500 will be charged if the sum of mono meter copies made on serial numbers - 2020-559900 and 2020-00024 is any value from 0 up to and including 1000.
 - If no minimum billing should be applied, leave the MinBilling and MinQuantity fields as 0.
 - For a more detailed explanation, read this important note on Minimum Billing and Meter Charge Setup.
- **Min Quantity:** Type in the minimum quantity (the copies that are included in the minimum billing amount).

- Account Code: Type in the sales account code for these meter charges to post to.
- **COS Account Code:** Type in the cost of sale account code where this fee should be posted to.

Scroll right until you can view the remaining columns in this frame.

- Customer Code and Customer Name:
 - Only populate these 2 fields if another party (a separate billing customer) is going to pay for the charges on behalf of the customer.
 - If these fields are left blank, BPO will bill the customer linked to the contract.
 - Note 1: BPO only supports different billing customers on an aggregate contract from BPO v2.3.0.4.
 - Note 2: Follow the next 4 screenshots only if you wish to link another party as the billing customer.

ADD METER LEVELS

- Scroll left to return to the Marked column.
- **Right click** in the **row** of the **item** you wish to **add** a **meter level** to. The item should be active (marked).
 - In this image the **Mono** meter has been selected.
- A Process menu will pop up.
- Click on Add Add a level.

Levels with Minimum Billing

The Aggregate Charges frame will be expanded.

- For this mono meter, there is a minimum billing set up of a R500 charge for the first combined 1000 copies (Minimum Quantity) made on all contract items included in aggregate billing. BPO calculates the usage charges by first calculating the minimum billing set up.
 - In this example, it means in BPO, a fixed charge of R500 will be charged for any number of mono copies made across all machines (total usage) included in aggregate billing from 0 up to and including 1000, thereafter a unit charge per copy will be applied i.e., from 1001.
 - 2. **From Quantity:** This is the number from which the unit charge will be effective.
 - The first row in the Meter Charges matrix, is static at 0. This means if there is minimum billing set up on the meter, the first row looks incorrect as the From Quantity field is static at 0.
 - If there is minimum billing set up on the meter, BPO does not read the From Quantity in the first row as 0 (although it displays as 0) but starts counting from (Minimum Quantity + 1). In this case, since (minimum billing level) is up to and including 1000, BPO will start counting from 1001.
 - For a more detailed explanation, read this important note on Minimum Billing and Meter Charge Setup.

- 3. **Unit Charge:** Type in the unit charge for the meter (charge per copy when Minimum Quantity is exceeded).
- Finance Amount: This should only be populated if there is a Back to Back Deal with a third party who is set up on BPO as a Supplier.
- 5. **Amend Date:** This is a static field.

• You can add additional charge levels.

Levels with no Minimum Billing

• The Aggregate Charges frame will be expanded.

Note: The Colour meter will be used as an example.

- There is no minimum billing set up on this meter. This means the usage calculation will only be based on what's set up in the Aggregate Charges matrix.
- 2. **From Quantity:** This is the number from which the unit charge will be effective.

- The first row in the Meter Charges matrix, is static at 0.
- For a more detailed explanation, read this important note on Minimum Billing and Meter Charge Setup.
- 3. **Unit Charge:** Type in the unit charge for the meter (charge per copy).
- Finance Amount: This should only be populated if there is a Back to Back Deal with a third party who is set up in BPO as Supplier.

5. Finance Amount: This field cannot be edited.

• You can add additional charge levels.

Link Additional Levels

• **Right click** anywhere in the **row** of the **item** that you wish to add **anothermeter level** to. (You can do this whilst the aggregate charges matrix is open / closed).

- Note: The Mono meter will be used as an example.
- The **Process** menu will pop up again.
- Click on **Add** Add a level.

A second level has now been added to the Aggregate Charges matrix.

- From Quantity: Type in or use the arrow indicators to select the number of copies from which this charge will be effective.
 - For a more detailed explanation, read this important note on Minimum Billing and Meter Charge Setup.
- Unit Charge: Type in or use the arrow indicators to select the unit charge for this additional meter (charge per copy). This charge will usually increase with each new level.
- Finance Amount: This should only be populated if there is a Back to Back Deal with a third party who is set up in BPO as a Supplier.
- Amend Date: This field cannot be edited.

Repeat this process to add more meter charges, as required.

EXAMPLES OF AGGREGATE BILLING CONTRACTS

Below are different scenarios of **Aggregate** contracts. These scenarios are not exhaustive.

Example 1:

A contract with aggregate fees and aggregate meters.

• Service Fee: R450

This will bill a total R450 in total, but this charge will be linked to the contract and not to items on the contract.

Mono Meter:

- Min Billing: R500 (for all three machines)
- Min Quantity: 3000 copies (across all three machines)
- **Copy Charge**: 5c after total usage of 3000 (across all 3 machines)
- Colour Meter:
 - No Min Billing
 - Copy Charge: 10c

The configuration will be as below:

Item Fees

- 1. Right side of the screen Items Fees Frame
 - 2. Serial No: **2020-00021** nothing is selected in the Item Fees frame.
 - 2. Serial No: **2020-00024** nothing is selected in the Item Fees frame.
 - 2. Serial No: **2020-00036** nothing is selected in the Item Fees frame.
- 3. Left side of the screen Aggregate Fees Frame
 - 4. The **Service** Fee is selected and set up in the **Aggregate Fees** section as explained in this manual.

Item Meters

- 1. Right side of the screen Items Fees Frame
 - 2. Serial No: **2020-00021** the mono and colour meters are selected. For both meters, only the Start Reading and Reading Date fields are updated.
 - 2. Serial No: **2020-00024** the mono and colour meters are selected. For both meters, only the Start Reading and Reading Date fields are updated.
 - 2. Serial No: **2020-00036** the mono and colour meters are selected. For both meters, only the Start Reading and Reading Date fields are updated.

3. Left side of the screen - Aggregate Meters Frame

4. Mono Meter

- 5. Min Billing: R500, Min Qty: 3000
- 6. Copy Charge: 5c
- 7. Colour Meter
 - 8. Min Billing: 0, Min Qty: 0

Help v2024.5.0.7/1.0 - Pg 43 - Printed: 21/08/2024

- 9. Copy Charge: 10c
- The remaining fields are set up as explained in this manual.

Example 2:

A contract with non-aggregate fees and aggregate meters.

- Service Fee:
 - Serial No: 2020-00021 the charge is R150
 - Serial No: **2020-00024** the charge is R170
 - Serial No: **2020-00036** the charge is R130 This will bill R450 in total, but this charge will be split per machine.
- Mono Meter:
 - Min Billing: R500 (for all three machines)
 - Min Quantity: 3000 copies (across all three machines)
 - Copy Charge: 5c after total usage of 3000 (across all 3 machines)
- Colour Meter:

- No Min Billing
- Copy Charge: 10c
