CONTRACT INVOICES

EDIT COMMENT AND ORDER NUMBERS

The contract invoice comment and order numbers are either input manually when creating a Manual Contract Invoice or generated via the Contract Billing process based on what is configured on the contract.

You now have the ability to edit Contract Invoices after they have been printed (billing run) or created (Manual contract invoice) to update the Order number and comments.

The 'Comment and Order' button will only be available for contract invoices in status **New** or **Printed**, and is controlled by user rights.

Ribbon Access: Contract > Manual Contract Invoice

Select the Site

Your employee user record should be linked to a default site. In this case, the site will auto populate with this default, otherwise the site must be manually selected.

Another site can be selected, if required, and if you have the security rights to access the site.

If **All Sites** displays here, then you do not have a default site configured on your user record, and need to select the required site.
