# SERVICE

# **CALL REQUESTS - ADD CALL REQUEST**

A *Call Request* can also be referred to as a *pre-call*. This feature is a business aid, to make a note of request(s) from a customer who is on hold, or who is over their allocated credit limit, or whose contract is on hold. No action will be taken to fix the customer issue until the customer and/or contract is no longer on hold, or the account has been settled. The call request is then converted to a **Call** and the standard call process is followed.

Refer to Service - Introduction to Calls for information related to Calls and the Call process.

The difference between a **Call** and a *Call Request* is that with a <u>Call</u>, the corresponding action is performed by the servicing business in response to the **Call**, within the stipulated **SLA period**.

Refer to **SLA Monitor Configuration** for information related to the SAL period.

A *Call Request* however, only log request(s) for a customer, with an account in arrears, who has been placed on hold, or whose contract is on hold. No corresponding action is performed to address the request until the customer or contract is no longer on hold, or the account has been settled. The call request then gets converted to a **Call**.

Ribbon Access: Service > Call Requests

- 1. The *Call Requests* screen will be displayed.
- 2. Select the *Site* where the call request needs to be created.
- 3. Click on Add.

Short cut key: Right click to display the Process menu list. Click on Add.

#### **OPEN CALL**

 If a call is open against the selected serial no, then you will receive an *Input Validation* message to confirm;

An open call with the following info exists against

*this machine: Reference no: CN*[ref. number], *Description:* [call description], *Call Type:* [call type]. *Are you sure a new call must be added?* 

- 2. Click on Yes to create a new call, or,
  - Click on **No** to ignore the request and to return to the Call Request screen.
- If you have selected to create a new call, continue logging the "Call Request Details" on page 7.

#### **CALL REQUEST DETAILS**

- **Customer:** The customer field will auto populate with the customer name selected.
- **Contact:** Click on the **search** button to select the contact you wish to add to the call request.
- **Contact No:** This field will auto populate with the contact number for the contact selected.
- **Call Type:** Click on the down **arrow** to select the required call type from the drop-down list.
- Error Code: Click on the down arrow to select the error code, quoted by the customer.
- **Description:** Click in the text box to type in a description of the work that is required.
- Call Date Time: This field will display the current date and time.
  - **Date:** Type in or click on the down **arrow** to select an alternative date using the calendar function, if

applicable.

- **Time:** Type in, or use the **arrow** indicators to select an alternative time, if applicable.
- **Priority<sup>1</sup>:** Type in or use the **arrow** indicators to select the call request priority.
- **Date required:** This field will default to the current date and time the call request is logged.
  - **Date:** Type in or click on the down **arrow** to select an alternative date, using the calendar function, if applicable.
  - **Time:** Type in, or use the **arrow** indicators to select an alternative time, if applicable.
- Order No: Type in the Purchase Order number raised by the customer, if applicable.

**Note** that the order number can be mandatory based on the customer contract configuration, i.e. if it is specified in the contract to include an Order Number, then this field will be mandatory for the particular customer.

- Logged By: This field will auto populate with the name of the person logging the call request. This field cannot be modified.
- **Status:** The status will be set to *N* New, by default and cannot be modified.
- **Optional No:** This field can be used for an optional reference number that the customer may wish to keep on record.
