PROCUREMENT

ADD SUPPLIER INVOICE

As noted in the [Supplier Invoice Introduction](#), a Supplier Invoice can be generated when [receiving Stock with Supplier Invoice](#) or when [receiving Services with Supplier Invoice](#).

But if the Supplier sends the Invoice after the goods or services are received, you can manually create the Supplier Invoice.

Ribbon Select Procurement > Invoices

The **Supplier Invoices Listing** screen will be displayed.

Select the Site

Your employee user record should be linked to a default site. In this case, the site will auto populate with this default, otherwise the site must be manually selected.

Another site can be selected, if required, and if you have the security rights to access the site.

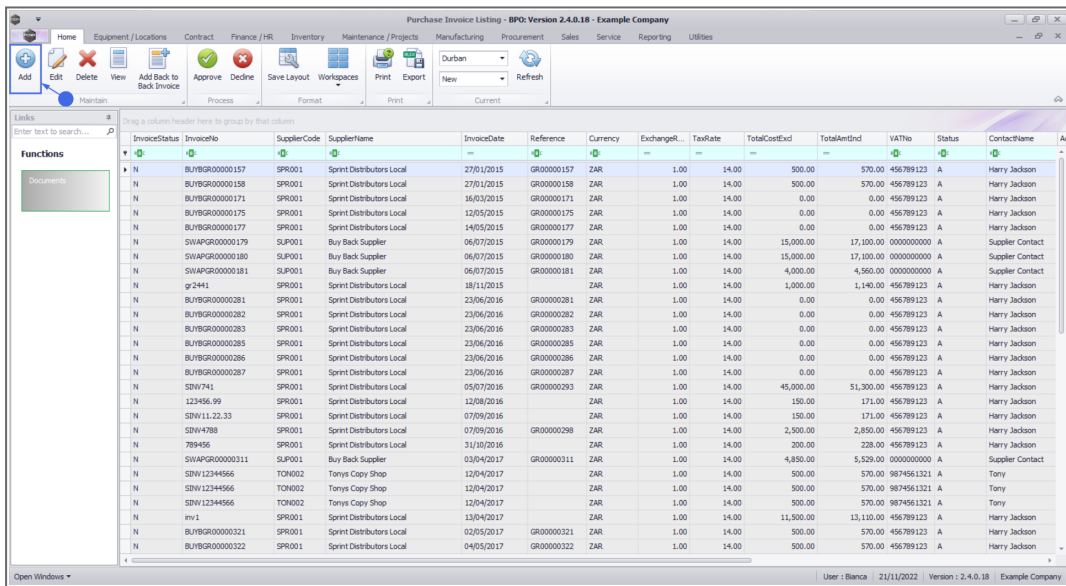

If **All Sites** displays here, then you do not have a default site configured on your user record, and need to select the required site.

Upon opening, this screen will default to the **New** status.

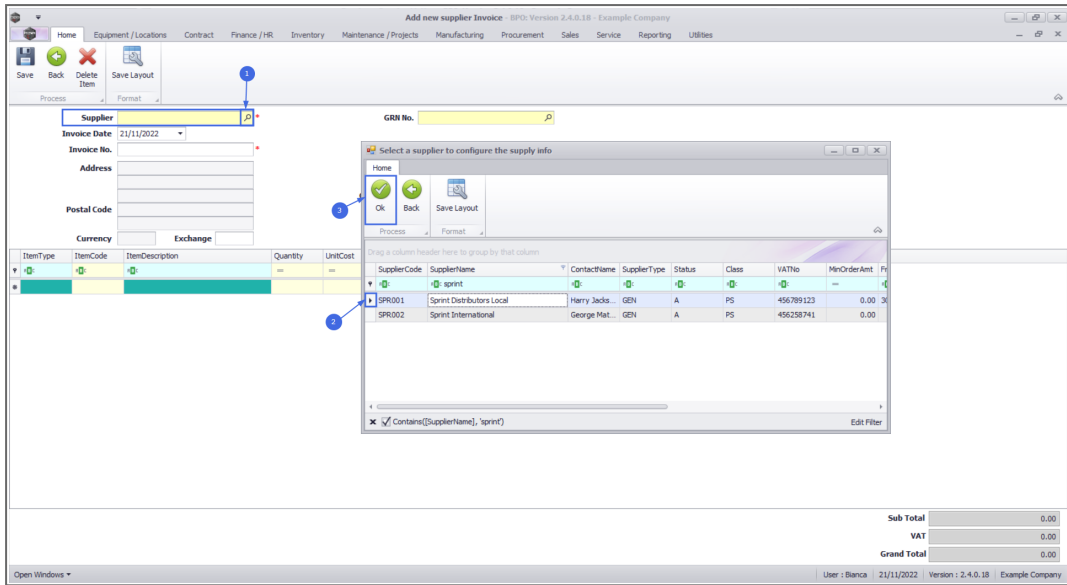

ADD SUPPLIER INVOICE

- Click on the **Add** button.

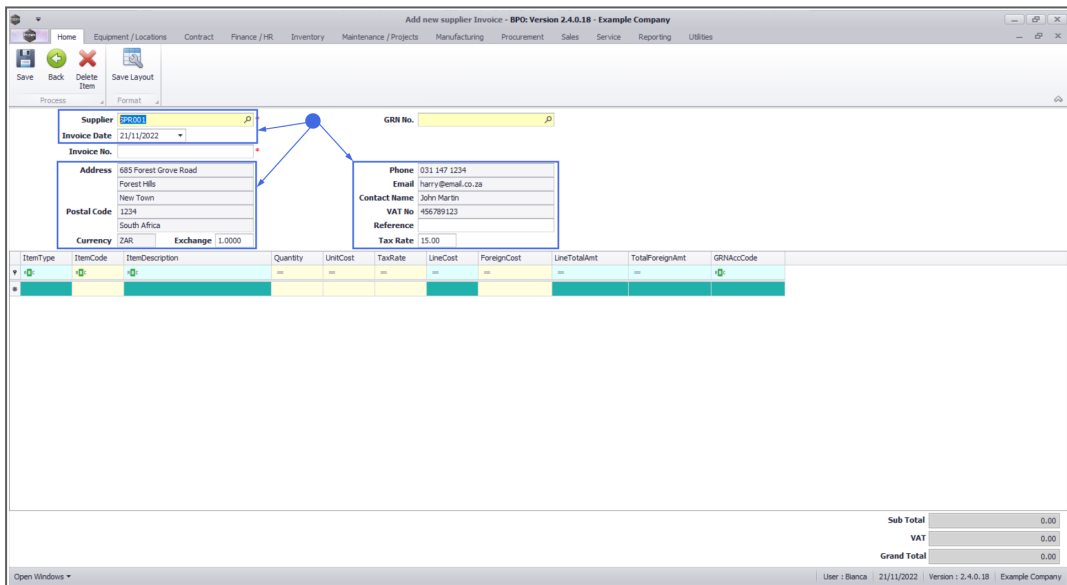

The **Supplier Invoice maintain** screen will be displayed.

- Search for and select the **Supplier**

SUPPLIER INVOICE HEADER

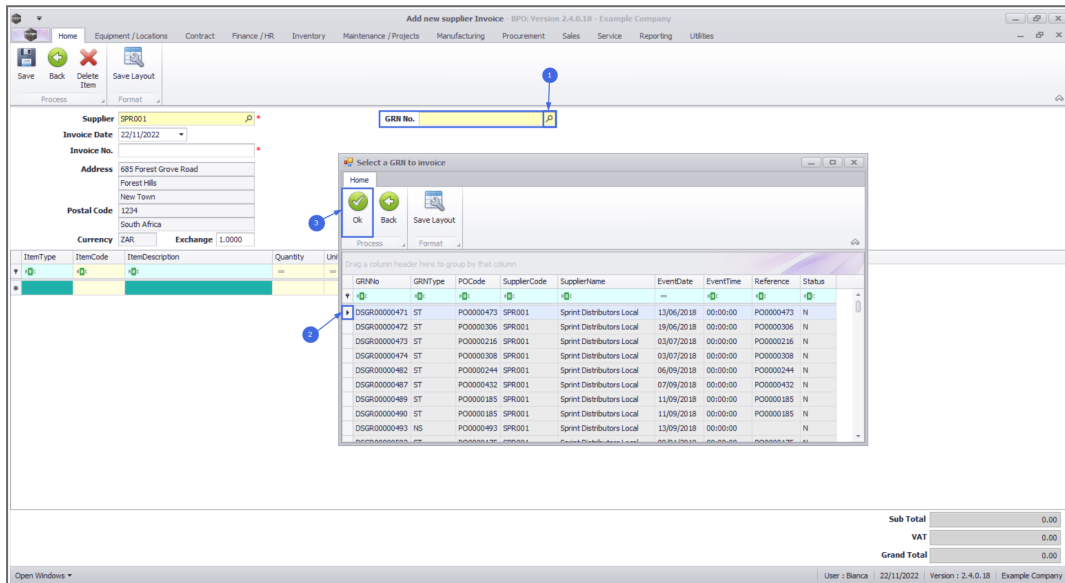

The **Supplier Invoice header** fields will populate with the Supplier Details and Supplier Invoice Date.

- Search for and select the **GRN No.**. This list will only display GRNs that are available for generating a Supplier Invoice.

Tips:

- The Invoice from the Supplier will usually note the corresponding Purchase Order number, which you can use to filter the list if you don't have the GRN number handy.
- If the GRN does not display in the list, then either the GRN has not been created yet, or the Supplier Invoice has already been created. You can use the **Supplier Invoice Match Report** In [Reporting](#) to see where this order is in the process.

This will populate the **GRN No.** field and the **Supplier Invoice Items** and **Totals.**

- Search for and select the **Supplier**

Item Type	Item Code	Item Description	Quantity	Unit Cost	Tax Rate	Line Cost	Foreign Cost	Line Total Amt	Total Foreign Amt	GRN Acc Code
BVNI	1020-147K	Toner Black	1,000	450.000	15.000	450.000	450.000	517.500	517.500

Supplier Invoice Number

- Type in the **Invoice No.** from the Supplier.

Note You can create Multiple Supplier Invoices per GRN, but the Supplier Invoice number must be unique.

Exchange Rate

If this is a **Foreign Currency Supplier**, then it will be a good idea to check that the **Exchange Rate** is correctly set. The value that is populated by default is pulled from the configured [Exchange Rates](#), which should ideally be updated every morning.

- You can override the **Exchange Rate** by typing it in here.

Reference

The **Reference** number is populated with the **Reference Number** from the Goods Received Note when the **GRN** is selected for Stock GRNs, which usually the **Purchase Order number** (if this was not changed manually). For **Non Stock GRNs** there is no **Reference Number** field, so the system will fetch an auto-populate this with the originating **Purchase Order** number. You can change or add to this reference, if required, by typing into the field.

Tax Rate

The **Tax Rate** percentage is populated when the Supplier is selected and is retrieved from the [Supplier detail](#). This value can be changed, but does not update the line items.

- If a Tax Rate percentage change occurred, and the Supplier detail has not been updated, or if the Supplier Invoice was created prior to said change, you can update the tax rate on the individual line items.

SUPPLIER INVOICE ITEMS

The Supplier Invoice on BPO should match the Invoice from the Supplier, so make sure to check that all items exist and that all quantities and costs are correct.

Line Item Cost

Pricing may have changed between the time the Purchase Order was created and receiving the Supplier Invoice. If the Supplier Invoice is received at the same time as the GRN, the unit costs can be updated when receiving the goods or services and this value will pull through to the Supplier Invoice.

However, in this instance, we are creating the Supplier Invoice after the GRN has been processed. Therefore, checking these costs against the Invoice from the Supplier is important.

Financial Posting Note:

- The value difference between the cost of the item on the GRN and Supplier Invoice will post to the Supplier Variance account via the SIVA driver when the Supplier Invoice is Approved.
- Type in the correct **UnitCost** where a change has occurred.

Item Type	Item Code	Item Description	Quantity	Unit Cost	Tax Rate	Line Cost	Foreign Cost	Line Total Amt	Total Foreign Amt	GRN Acc Code

Partial Supplier Invoice

The Supplier may Invoice some of the goods or services received, and send another invoice for the remaining items. If this is the case, you can change the quantities or remove lines. Once the remainder of the items have been Invoice by the Supplier, you can create a another Supplier Invoice for these remaining items.

Partial Quantities

You can change the **Quantity** to less than the GRN amount, if necessary.

- Type in or use the arrows to adjust the quantity to match the Invoice from the Supplier.

Increasing Quantities

You can change the **Quantity** to more than the GRN amount, if necessary, but you will need to create a Stock Adjustment in order to match the Supplier Invoice.

- Type in or use the arrows to adjust the quantity to match the Invoice from the Supplier.
