# CONTRACT

## TRAVEL RADII

Travel Radii or Travel Zones determine a set fee to charge a client for travel within a certain range of kilometres.

You need to set up an expense allocation: '**TVCH**' as the expense allocation code, to ensure the allocation matches with the travel radii.

#### Notes on Billing:

#### **Contracts**

If you wish to include travel on a contract, set the travel distance on the Contract Item to '**0**'. If you do not wish to include travel, and thus bill any travel costs incurred, then set the actual travel distance on the contract item. See **Contracts: Creating A New Contract - Link Travel Radius** for details on how to add a travel radius to a contract item.

#### **Non-Contract Machines**

If you wish to bill travel on a machine each time a call is logged, set the travel distance on the machine detail. See Assets: Editing Assets for how to add travel distance to a machine. If you do not wish to bill travel every time a call is raised against a machine, set this travel distance on the machine detail to '**0**'.

#### **Once -Off Travel Charge**

If you then wish to bill a '**once-off**' travel charge, add travel on the invoice by selecting the '**TRVL**' item type and then selecting the zone you wish to bill.

See Sales Invoices: Add a Sales Invoice - Add An Item Type - Travel (TRVL)

for details on how to add a travel charge to an invoice.

### **ADD TRAVEL CHARGE**

- **Right click** in any **row** of the Travel Radii data grid.
- A Process menu will pop up.
- Click on Add Add New Travel Charge.

A new line has been added to the data grid.

- Travel Radii ID: This field is un-editable.
- **Maximum Distance:** Type in the maximum distance for this zone that the fee applies to.
- Fee: Type in the fee for this travel zone.
- **Charge Rate:** Type in the rate per kilometer for the last level of the travel radii, as reference.
  - Note: This does not automatically calculate. You will be billing by using the zone fees.
- Company ID: This field is un-editable.
