CONTRACTS

BUY BACK CONFIGURATION

Buy Back processing allows you to purchase a customer asset (serialised item that belongs to one of your customers) and bring that item into stock.

In the Buy Back Configuration, you will select the relevant Buy Back supplier per site, and whether the buy back should be auto processed or not.

• Ribbon select Contract > Buy Back Configuration.

• •								BPO Configura	ator : Vers	sion 2.4.1.1 ·	Example Co	mpany		- 8 ×
	Accounts	Call Cer	ntre Compa	any Contract	Departments	Human Resources	Inventory	Reporting	Sales	Security	Services	Static Data	Open-4Business	
*				×

- AutoProcessTrx: Select this flag to allow the system to auto process the buy back. This means that the system will create the PR, PO and GRN on your behalf.
 - If this flag is not selected, the Purchase Requisition will be created, and you will need to complete the procurement process. Only use this configuration if you want control over the Supplier that is used and the authorisation process.
- **CreateSupplierInv**: Select this flag to allow the system to auto create the Supplier Invoice for the buy back process. The Supplier Invoice must still be manually accepted.
 - If this flag is not selected, the Supplier Invoice must be created manually before it is manually accepted. Only

use this configuration if you want control over Supplier Invoices created.
