

We are currently updating our site; thank you for your patience.

INVENTORY

RAISE A REVALUATION REQUEST

Stock revaluation enables you to adjust the cost of stock items to reflect a changes in the standard cost of an item without changing the stock quantity.

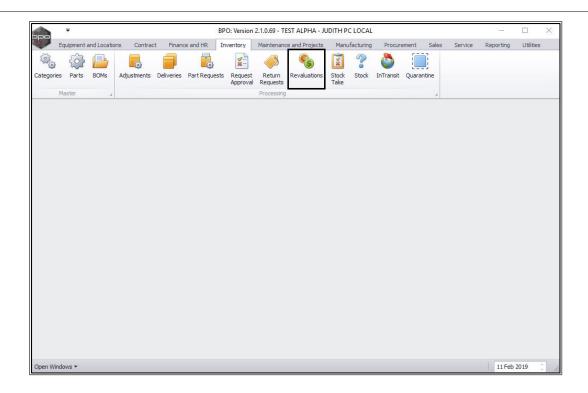

These changes in value may be due to many different factors including, for example:

- Changes in procurement
- Changes in manufacturing
- Exchange rate movements

A Revaluation Request could also be auto created by the **Receiving Goods with** Landed Cost Revaluation process.

Ribbon Access: Inventory > Revaluations

The **Revaluation Request Listing** screen will be displayed.

- 1. Select the Site.
 - In this image, **Durban** has been selected.
- 2. Select the Status.
 - In this image, **New** has been selected.

Note: You can add a stock revaluation request in <u>any</u> status but for you to view the newly created stock revaluation request, you have to be in status **New**.

CREATE/ADD REVALUATION REQUEST

3. Click on **Add**.

ADD A C-CLASS PART <u>NOT</u> LINKED TO BATCH TRACKING

- In both of these method, the C-Class part that was selected did <u>not</u> have <u>Batch Tracking</u> linked. The <u>Batch Serial No</u> field in the <u>Parts</u> data grid will therefore be <u>blank</u>.
 - **Part Desc:** This will populate with the selected part code.
 - Part Desc: This will populate with the part description.
 - Warehouse Name: This will populate with the default stock warehouse name. This can be changed as explained further in this manual.
 - **Bin Location Name:** This will populate with the default stock bin. This can be changed as explained further in this manual.
 - **Batch Serial No:** This will be blank as this part is <u>not</u> linked to <u>batch tracking</u>.
 - Unit Cost: This will populate with the average unit cost of the part as currently set on the system.
 - **Qty SOH:** This will populate with the quantity stock on hand of this part as recorded on the system.
 - New Unit Cost: You will either type in or use directional arrows to select the new unit cost (according to the revaluation) in this field.
 - **Balance of Useful Life:** As this is a C-Class part this field is not relevant and should be left as 0.
 - (If this was an A or B-Class part you would type in the remaining useful life of the item in months. This will be used in

asset depreciation calculations when the item is converted to an asset. If asset depreciation is not used leave as 0.

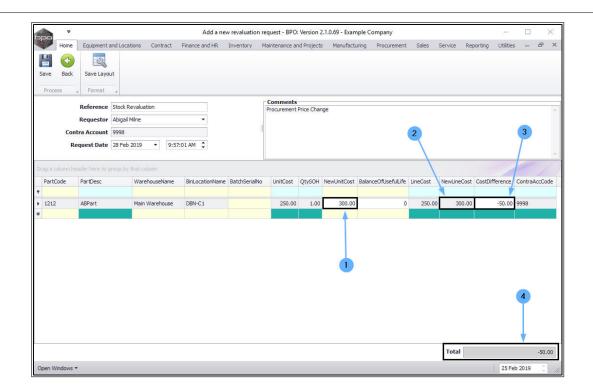

- Line Cost: This will populate with the Unit Cost of the selected part multiplied by the Qty Stock on Hand.
- New Line Cost: This will populate with the New Unit Cost of the selected part multiplied by the Qty Stock on Hand and will auto populate once the New Unit Cost has been typed in.
- **Cost Difference:** The system will calculate the sum of the Unit Cost minus the New Unit Cost and populate this field accordingly.
- **Contra Account Code:** This will populate with the general ledger account code set up in the company configuration.
- 2. The Total field displays the total difference between the existing cost and the new cost.

- 1. Once the New Unit Cost has been entered, the system will calculate
- 2. the New Line Cost and the
- 3. Cost Difference, which will affect the
- 4. Total amount.

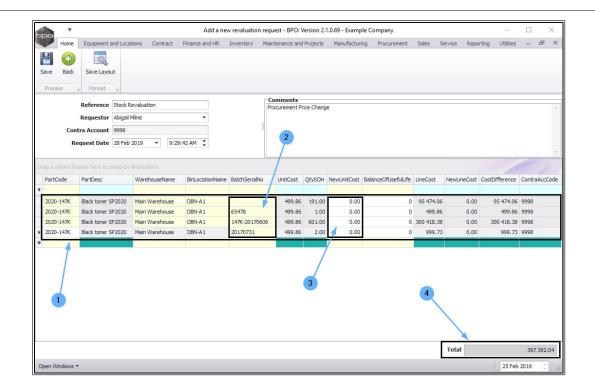

ADD A C-CLASS PART LINKED TO BATCH TRACKING

Use either Method 1 or Method 2 above to select a C-Class part.

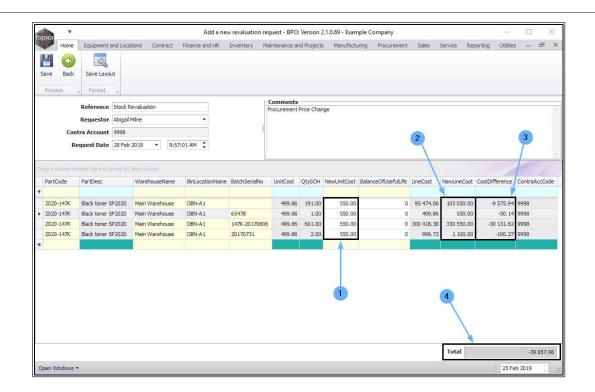

- 1. The Parts data grid will populate with the selected part code .
- 2. All the selected part **batches** in the stock warehouse will be listed, each batch will be on a **separate** line.
- 3. You will only need to type in a **New Unit Cost** for one batch, as you type in the new cost, the system will auto populate the remaining batches with the same amount.
- 4. The Total field will display...

- 1. Once the New Unit Cost(s) has been entered, the system will calculate
- 2. the New Line Cost for each batch line and the
- 3. Cost Difference for each batch line, which will affect the
- 4. Total amount.

ADD AN A OR B-CLASS PART/ITEM

Use either Method 1 or Method 2 above to select an A or B-Class part.

- 1. The **Part Code** and **Part Description** fields will populate with the selected part.
- 2. However, unlike with C-Class parts/items, the:
 - Unit Cost
 - Qty SOH
 - New Unit Cost
 - Line Cost
 - New Line Cost
 - Cost Difference

fields will not be populated, as with an A or B-Class part/item you need to select a **Serial No.** first.

3. With no figures in the Parts data grid, the **Total** field will be populated with nil.

- **Batch Serial No:** This will be populate with the selected part serial number.
- Unit Cost: This will auto populate with the actual value of the selected item.
- **Qty SOH:** This will always populate with **1** for A or B-Class items because each serial number is **unique**.
- Line Cost: This will auto populate with the same value as the Unit Cost as only 1 A or B-Class item can be listed per line.

• **Cost Difference:** The system will calculate the sum of the Unit Cost minus the New Unit Cost and populate this field accordingly.

CHANGE THE WAREHOUSE

The Warehouse Name and Bin Name fields auto populate as a part/item is selected with the default stock warehouse and bin as set up on the system. You may want to change the warehouse and/or bin for a part/item if, for example, the incorrect warehouse was either auto populated or selected at the start of the process.

For this process, the warehouse of the A Class part/item selected above will be changed.

• Click in the Warehouse Name text box.
