# SALES CONNECT

We are currently updating our site; thank you for your patience.

## VERSION RELEASE NOTES

**Sales Connect Version List:**

[2.0.2 For Android] [1.0.12 For Android] [1.0.10 For Android]

---

2.0.2 - For Android (22.08.2022 10:30 PM)

---

- **Release Priority:** Medium

- **Database Prerequisites:**
  - o BPO CRM v3.6.2.3
  - o BPO2 v2.4.0.11

- **Application Type:** BPO Companion Application – Android Application

**Sales Connect APK v2.0.2**

- CR 163 – The full migration and refinement of the existing functionality of Sales Connect to Flutter and Dart, including the following:
  - Secure user login whereby authentication is used to only allow a user with an active BPO / CRM login to utilize the system.
  - Connection to CRM Web Service.
  - Syncing of case activities for a user and their subordinates with an activity logging facility and data

integrity checks to avoid conflicts with the database backend.

- Filter by activity type.
- View all 'In Progress' activities (All activities where users have started travel or started activity) via a separate listing.
- Open an activity and view details regarding a case and the current activity.
- Add photos (from both camera and gallery) and notes to an activity.
- Reschedule an activity to another date and time (this includes same date and new time)
- Change the current events between Start Travel, End Travel, Start Work and End Work.
- Create a new activity after completing an activity.

## Additional Information

- The minimum requirement is Android version 4.1 (API Level 16). The target SDK is set to Android version 11 (API Level 30) with the development SDK set for Android version 12 (API Level 31).

## Rollout Details
