6.0.0.0 (13.11.2020 4:32 PM)

- **Release Priority:** Low
- **Database Prerequisites:** BPO v2.4.0.1
- **Application Type:** BPO Supporting Application – Windows service

RSI_PrintService v6.0.0.0 MODIFICATIONS

- CR 74: Application updated to make use of the new HTML emailing functionality:
 - New email template.
 - New email flag (**DOCPrintServiceEmail**).
 - Modify source code to handle HTML email processing.
 - Print Service versioned up to v6.0.0.0
- DBN0095325 – Resolved issue for Print Service failing to process documents in the BPO Print Queue Viewer. The error ‘Failed To Process Successfully’ is displayed in the log files when Print Service attempts to process documents.
- DBN0096573 – Resolved issue for read receipt message box being displayed in outlook after reading the email sent from Print Service, even though the ‘ReadReceipt’ flag in the Env.n.xml file is set to false.
- DBN0096673 – The ‘ZIPFiles’ flag in the Env.n.xml file did not work. This issue has been resolved.

Additional Notes:

- ‘Microsoft Print to PDF’ is an invalid printer setup and should not be used.
- ‘ProcessZeroValueInvoices’ flag in the Env.n.xml file pertains to contract invoice processing only.

- Each time a change is made to the Env.n.xml file, Print Service must be restarted for the changes to take effect.

Rollout Details

- Run the RSI_PrintService_v6.0.0.0_Upgrade, and check for errors in the results file
- Install RSI_PrintService_Setup_v6.0.0.0_x64
