ACCOUNTS

ACCOUNT DRIVERS – STOCK REVALUATIONS – DECREASE

An accounts driver is an event that will check the transaction you are busy with on Nucleus Service and verify whether there is a financial effect to be posted to Nucleus Accounts or Sage Evolution. Refer to the Account Driver Introduction manual for more information.

The example below is based on the Non-Segmented 'Base' General Ledger.

STOCK REVALUATIONS – INCREASE (REVD)

Stock Revaluations will have financial impact on the Stock Control account. The revaluation suspense account holds the difference between the value of the stock before and after revaluation.

TRANSACTION POSTING

Dr/Cr	Description	Debit Amount	Credit Amount
Dr	Stock	100	
Cr	Revaluation Suspense		100

TRANSACTION SETUP
