ACCOUNT DRIVERS - STOCK TAKE - DECREASE

An accounts driver is an event that will check the transaction you are busy with on Nucleus Service and verify whether there is a financial effect to be posted to Nucleus Accounts or Sage Evolution. Refer to the [Account Driver Introduction](#) manual for more information.

The example below is based on the Non-Segmented 'Base' General Ledger.

STOCK TAKE - DECREASE (STKD)

Where the physical non-serialised stock position is found to be less than the system stock position, during a stock take, the stock position will be decreased.
