ACCOUNTS

ACCOUNT DRIVERS – STOCK TAKE – INCREASE

An accounts driver is an event that will check the transaction you are busy with on Nucleus Service and verify whether there is a financial effect to be posted to Nucleus Accounts or Sage Evolution. Refer to the Account Driver Introduction manual for more information.

The example below is based on the Non-Segmented 'Base' General Ledger.

STOCK TAKE – INCREASE (STKI)

Where the physical non-serialised stock position is found to be more than the system stock position, during a stock take, the stock position will be increased.
