

ACCOUNTS

ACCOUNT DRIVERS - STOCK TRANSFER - IN

An accounts driver is an event that will check the transaction you are busy with on Nucleus Service and verify whether there is a financial effect to be posted to Nucleus Accounts or Sage Evolution. Refer to the <u>Account Driver</u> Introduction manual for more information.

The example below is based on the Non-Segmented 'Base' General Ledger.

STOCK TRANSFER - IN (TRIN)

Stock moved into a bin location, where it has moved out of another bin location. Stock transfers process entries where the warehouses are linked to different GL accounts. Otherwise no entries are processed.

TRANSACTION POSTING

Dr/Cr	Description	Debit	Credit	
		Amount	Amount	
Dr	Stock	100		
Cr	Transfer Suspense		100
