INVENTORY

PARTS – ITEMS SUPPLIED – LINK A BARCODE

A barcode system allow you to link barcodes (and/or QR labels) to your inventory items.

Our barcode software:, which uses a hand-held scanner, will translate these barcodes and use them to:

- Print and scan the barcodes
- Ship, receive and count inventory
- Handle order management
- Track items across multiple sites and locations
- Integrate with the accounting system

Refer to [Introduction to SConnect](#) for more information.

Since logging the original part definition on the system, the company may have subsequently decided to use a [Handheld Scanner \(SConnect\)](#) to scan, record and track stock items. Linking a barcode (per supplier) to the part definition is necessary for this process.

Ribbon Access: Inventory > Parts

1. The **Part Listing** screen will display.

SELECT THE PART

2. Select the row of the part definition where you wish to allocate a supplier barcode.

SELECT ITEMS SUPPLIED

3. Click on the **Items Supplied** tile.
