MAINTENANCE

TASKS – ASSIGN / REMOVE A BILL OF MATERIALS (BOM)

Linking material resource requirements to a Task, gives you the ability to see which parts are required for the Task to be completed. Part Requests will be created for the Task when the Task is generated. In order to link a Bill of Materials for parts required, you will need to ensure one has been configured. Refer to the **Creating a New Bill of Materials** manual to ensure that a BOM is already set up before you continue with this manual.

Ribbon Access: Maintenance / Projects > Tasks

- 1. The **Tasks** listing screen will be displayed.
- 2. Click on the **row** of the task you wish to assign a BOM to.
- 3. Click on Edit.

Short cut key: Right click to display the Process menu list. Click on Edit.
