 Prov. Version 2.5

ADHOC ESCALATIONS SCREEN OVERVIEW

The **Adhoc Escalations** screen will be displayed, listing all **Active** contracts. This screen is divided into **4** frames:

- 1. Contract Types to be escalated.
- 2. Fee Types to be escalated.
- 3. Contracts to be escalated.
- 4. **Contract Items Charges** frame: where contract items that meet the requirements selected in frames **1**, **2** and **3** are displayed.

User Defined Fields

The inclusion of User Defined Fields is to provide more information within the Asset, Contract, Customer and Location modules so that associated work/processes can be carried out more efficiently. It will serve as connective tissue between contracts and call center functions to improve call center performance by having readily accessible information.

Version Compatibility¹

Contract **Class** and **Category**, as <u>defined on the contract</u>, can be useful when filtering for contracts that you need to escalate.

- The **check boxes** are all **marked** when you first open the Adhoc Escalations screen.
 - This means that all the contract types and fees will be affected by any adhoc escalation changes that are made in this screen.

AMOUNT, INCREASE AND NEW AMOUNT COLUMNS

In the Linked Contract Item Charges Listing frame, look at the **Amount**, **Increase** and **New Amount** columns.

- Amount: This is the amount of the fee that is being charged.
- Increase: This is the amount by which this fee will increase when the periodic escalation set on the contract is applied. (This can either be a Percentage or a Flat Amount).

- In this image, the amount already set up on the system is a 10% escalation.
- New Amount: This is the new amount of the fee once the increase has been added. (Amount + Increase = New Amount)

You can make individual changes to the **Increase** amount, but when an escalation across multiple charges is required, then apply an escalation percentage across all marked items, as noted next.
