SERVICE

CALLS – ADD TRAVEL

If you want to keep track of travel done by a technician, you can log this on the call.

The travel logged on a call will not be billed.

The system previously used the **Billable** flag in order to invoice travel, however, travel is now billed via **Travel Radii** or **Travel Zones** - which will check the contract / asset configuration to see whether travel should be billed or not.
Travel can also be added to an invoice separately. Travel Radii must be set up correctly.

If you cannot link travel to the call due to the message: 'No items to select from', then an Expense Allocation, Expense Type, and Travel Rate must be configured.
