BPO_DRIVER CONNECT

VERSION RELEASE NOTES

BPO_Driver Connect Version List:

[1.0.0.1 Official Release] [1.0.0.1 RC1]

1.0.0.1 Official Release (12.06.2020 5:42 PM)

- **Rollout Priority / Requirement:** Low
- **Database Prerequisite:** BPO2 v2.4.0.0 or later
- **Requirements:**
  - BPO Driver Connect Web Service v1.0.0.1
  - BPO Delivery Note Service v1.0.0.0
  - BPO Driver Connect apk v1.0.1 for Android

BPO Driver Connect

- A Call is logged in BPO with part requests that are already issued. The Call is then assigned to a driver. The driver will then deliver the parts / items to the customer and have them sign on an electronic signature pad in the Driver Connect app which will then save the parts delivered details in a queue and save the issued stock details to the BPO database. There must be a tick list of all different part codes being delivered and a count. The item count is saved to the database as well as the work order / call ids saved to the delivery note queue in which the issued items can be retrieved for the BPO_DeliveryNoteService windows service that will send out the delivery notes.
- Please review the Specification Documents for more detail:

- SOX_Driver Connect V1.00
- Driver Connect Specification
- BPO_DeliveryNoteService Specification

Rollout Details

- Run the BPODriverWebService_v1.0.0.1_Upgrade upgrade, and check for errors in the results file
