

SALES

CUSTOMERS - DELETE CUSTOMER

Customers can only be deleted if the customer does not have any transactions or assets or contracts or calls. Customer records with contacts and addresses only are allowed for deletion.

Deleting a Customer will change the status for the Customer to **(X) Deleted**. If *BPO* is integrated with *Evolution*, the customer will show as **Deleted in BPO**.

Ribbon Select *Sales > Customers*

The **Customer Listing** screen will be displayed.

Select the Site

Your employee user record should be linked to a default site. In this case, the site will auto populate with this default, otherwise the site must be manually selected.

Another site can be selected, if required, and if you have the security rights to access the site.

If **All Sites** displays here, then you do not have a default site configured on your user record, and need to select the required site.

Upon opening, this screen will default to the **Active** status, listing all the **Active** contracts for the selected site.
