

USER GROUP AND SECURITY

PROCUREMENT AUTHORISATION

Security rights must be configured linking the [Procurement Authorisation Configuration](#) to the relevant User Group.

For example:

In the screenshot below - the **Purchasing Manager** may raise a maintenance requisition (stock / non-stock) up to the value of **R5,000** before it requires a second approval from the **General Manager**, who has an authorisation limit up to **R100,000**.

The **Purchasing Manager** may also raise a capital expenditure requisition (buy-back) up to the value of **R10,000** before it requires a second approval from the **General Manager** who has an authorisation limit up to **R100,000**.

Note: For more information about Purchase Centre requisition approval go to: [Procurement Authorisation Configuration](#).

The same security configuration applies to the General Manager.

Ribbon Access: Configurator > Security > User and Group Security

CONFIGURE PROCUREMENT AUTHORISATION FOR THE PURCHASING MANAGER

- The **User Rights** screen will be displayed.
- Click on the **drop-down arrow** in the **Find Group** section of the ribbon toolbar.

- A **Group Name and Description** drop-down list will be displayed.
- Scroll down this list until you find **PRMA - Procurement Management**, click on this group name.

A **Code and Access Level** data grid will be displayed.

1. Search for the the **PRCH_MAIN Procurement** row.
2. You will note that currently the Procurement Management Access Level is set to **3 - Limited Access**.
3. Click in the **Access Level** field of that row.
